FOREWORD

The Items Responses Analysis in Commerce subject in the Advanced Certificates of Secondary Education Examinations (ACSEE) 2015, was written in order to provide feedback to students, teachers, parents, policy makers and other educational stakeholders on the candidates' performance and the challenges that candidates faced in attempting the examination questions in this subject. Generally this subject had good performance. The report has, therefore, tried to reveal the factors that can be attributed to the candidates' performance.

The Advanced Certificates of Secondary Education Examinations marks the end of two years of Advanced Secondary Education. It is a summative evaluation which among other things shows the effectiveness of education system in general and education delivery system in particular. Essentially, the candidates' responses to the examination questions is a strong indicator of what the education system was able or unable to offer to the students in their two years of Advanced Secondary Education.

The analysis presented in this report is intended to contribute towards understanding of the reasons for good/poor performance of the candidates. The report highlights the factors that made the candidates to score high marks. Such factors include sufficient knowledge and skills on the concepts tested, good flow of ideas, ability to identify the tasks of the questions and good masterly of English Language. The report also highlights the factors that account for some candidates' failure to score high marks. Such factors include failure to identify the task of the questions, inability to express themselves in English Language and lack of knowledge and skills on the subject matter. The feedback provided will enable the educational administrators and other stakeholders to take proper measures in order to improve the candidates' performance in future examinations.

The National Examinations Council of Tanzania will highly appreciate comments and suggestions from teachers, students and stakeholders that can be used for improving future items response analysis in Commerce. Finally, the Council would like to thank all the Examination Officers, Subject Teachers and all others who participated in preparing this report.

Dr. Charles E. Msonde **EXECUTIVE SECRETARY**

1.0 INTRODUCTION

This report presents the items responses analysis on the performance of candidates who sat for the Advance Certificate of Secondary Education Examination (ACSEE) May 2015. The examination assessed the ACSEE competences stipulated in the 2010 syllabus.

The examination had two papers, 152/1 Commerce 1 and 152/2 Commerce 2. Commerce paper 1 had eight questions divided into two sections, A and B while each section had four questions. The candidates were required to answer five (5) questions, choosing at least two from each section. Commerce paper 2 had eight questions; four questions from section A and four questions from section B. The candidates were required to answer five questions, choosing three questions from section A where question 1 was compulsory and choosing any two question from section B. The weight per question both in paper 1 and paper 2 was 20 marks.

This report analyses the performance of candidates by indicating the questions demands and identifying the candidates' strengths and weaknesses in answering the questions. It is expected that this report will be useful for teachers and other stakeholders in their efforts to improve the teaching and learning of Commerce.

A total of 1,042 candidates sat for the examination in 2015. The results show that 1,040 candidates (99.81%) passed with the following grades: grade A 28, grade B⁺ 438, grade B 390, grade C 163 and grade D 21. However, 2 candidates (0.09%) failed by scoring grade E. Generally, candidates' performance in this subject increased by 0.05 percent compared with that of 2014 in which out of 823 candidates who sat for that examination, 821 candidates (99.79%) passed and 2 candidates (0.24%) failed.

The comments on individual questions for the ACSEE 2015 Commerce examination are presented in the next section. The presentation highlights the requirements of the questions and what the candidates were expected to do. Extract samples of good and poor performance are inserted to illustrate the reported cases.

2.0 ANALYSIS ON INDIVIDUAL QUESTIONS

2.1 Paper one

2.1.1 Question 1: Insurance

The question had two parts (a) and (b). In part (a), the candidates were required to differentiate cover note from insurance policy and to elaborate three functions of the cover note and in part (b), they were required to (i) explain the procedures necessary for making an insurance claim and (ii) show the amount of compensation to be paid to insured by the insurer and explain the principle of insurance applied in compensating the loss from the following data: value of stock was shs 150,000,000, the value insured shs 80,000,000 and his store was blazed and everything was destroyed.

The question was attempted by 223 candidates (21.4%) and the performance was good, as 17.5 percent of them scored from 15.5 to 20 marks, 38.1 percent scored from 10.5 to 15 marks, 33.2 percent scored from 6 to 10 marks and only 11.2 percent scored from 1 to 5.5 marks. Even though the performance in this question was good, it was highly omitted by the majority of the candidates.

The candidates who scored from 15.5 to 20 marks had sufficient skills and knowledge on the topic tested and hence managed to answer correctly part (a) by identifying the main difference between cover note and an insurance policy. Most of them were able to describe the functions of cover note while a few candidates managed to describe two functions out of the required three. In part (b) (i), some of these candidates managed to explain all necessary procedures such as reporting on the occurrence of the loss, filling in the claim form, assessment of the loss and compensation. However, some candidates failed to explain the first procedure because they failed to realise that, it is the task of the insured to notify the insurer about the occurrence of loss instead they explained it as it is the task of the insured to keep records on the happening of the events without notifying the insured and present the records to insurer at the time of filling in claim forms.

In part (b) (ii), the majority of the candidates got right the amount to be compensated to be compensated to Joseph which was Tshs 80.000,000 because it was the only amount that has been insured and all stock had been blazed and they managed to explain the principle applied to compensate the loss that was the principle of indemnity under which the insured is paid only what exactly has been lost. Some of the candidates failed to state the amount paid to Joseph because they computed the amount as if the stock insured was partially destroyed. Extract 1.1 presents a sample of good response from a script of a candidate with adequate knowledge and skills on the topic tested.

Extract 1.1

1.	a A cover note or binder is a document
	issued by the insurer to the injured after
	the hist premium has been raid action as a
	the first premium how been paid aching as a temporary contract before the policy is issued
	WHILE
	Insurance policy is an insurance contract between insurer and insured issued after 30 days since

not get more than what he incured.	
The Mark decided the formation of the Mark Harles	
The principle of Indemnity applies in this event. This principle states that, the insurance is aimed	
at compensating the loss occurred and not to	
benefit the insured Under this circumstance, the insured will be restored to his former position before the	
loss occured. Therefore, brice Foreph insured she so, or, on	
of his shock, he will not gain more than she to, un, on	

Extract 1.1 shows a sample of a good response from a script of a candidate who managed to: differentiate cover note from insurance policy, elaborate functions of cover note, procedures necessary for making insurance claim, the amount to be compensated to Joseph and the principle applied in compensation.

The candidates scored from 6 to 10 marks were able to answer the question as required in part (a) and part (b) (ii) but failed to respond correctly in part (b) (i) because they confused the procedures for taking an insurance and the procedures for making an insurance claim while others managed to answer correctly part (b) but responded incorrectly in part (a) by reversing the explanations of cover note with that of insurance policy. Their scores vary according to the number of correct points and details given by the candidates.

The majority of the candidates with poor performance had their scores ranging from 1 to 5.5 marks. Some of them were able to differentiate a cover note from an insurance policy in part (a) and elaborate the last two procedures of taking insurance claim in part (b) (i). Other candidates responded by differentiating the terms given only and skipped the other parts of the question. Some confused the procedures necessary in taking out insurance and procedures necessary for making insurance claim; however, they managed to differentiate cover note from insurance policy. They also failed to state the amount of money to be paid to Joseph as

compensation because they applied incorrect formula and failed to state the correct principle applied in compensating the loss to Joseph because they assumed that by not insuring all of his stock he did not disclose the fact about his stock and therefore the principle applied should be ultmost good faith which was incorrect. Extract 1.2 shows a sample of a poor response from a script of a candidate who managed to differentiate the terms but failed to arrange the procedures serially and compute the amount to be paid to Joseph. Extract 1.3 shows a sample of a response of candidate who failed to identify the task of the question in part (b) (i).

Extract 1.3 shows a sample of a response from a script of a candidate who explained the procedures necessary in taking out insurance instead of the procedures necessary for making insurance claim. However, the candidate managed to show the amount to be paid to Joseph as compensation and the principle applied on compensation.

2.1.2 Question 2: Wholesale Trade

The question had two parts, (a) and part (b). In part (a), the candidates were required to explain five roles of middlemen in distribution process and in part (b), they were required to elaborate five kinds of mercantile agents.

The question was attempted by 933 candidates (89.5%) out of which 8.9 percent scored from 15.5 to 19 marks, 52.1 percent scored from 10.5 to 15 marks, 33.7 percent scored from 6 to 10 marks and only 5.3 percent scored from 0 to 5.5 marks. The overall performance in this question was good.

The candidates who scored from 10.5 to 19 marks managed to explain the roles of middlemen in the distribution process such as risk bearing, facilitate stability of price of commodities, provide transport facility, prepare goods for sale, storage facilities, market research, link between producer and the final consumers, breaking the bulk and providing credit facilities to customers and sometime to producers, They also elaborated different kinds of mercantile agent with some examples. However, some of them failed to provide sufficient explanations to some of the points such as market research and price stability while in part (b), some of the candidates mixed correct and incorrect responses. For example, they mixed the description for factors with that of brokers. Extract 2.1 shows a sample of a good response.

Extract 2.1

20	Middlemen :- These are experties who works
	in between producers and consumers; They provide
	a Link between producers and consumers of goods.
	and services : - The following are their roles in
	distribution process:
	Risk bearing; their main function is
	risk bearing they bear risks on behalf of producers
	Like risks of spoilage, damage, and change in
	fashion, value of goods but they undertakes to
	take the goods and distribute to consumers.
	hence its among their role in distribution process also
	Transportation; - also middlemen
	transport goods from producers and undertakes
	to deliver to attimate consumers and ensurer
	regular supply of goods and reducer delays
	ondelivery of goods its also among their roles.
	Market research; - also middlemen
	conducts market research on behalf op
	producers and enables them to know market
	conditions exists like what to supply,
	at what quality and enables middlemen
	to advice producers on what to supply
	according to existing demand conditions by
	consumers.
	Storage facilities; - also middlemen
	they offer storage to act of holding and preserving
	stocks till are needed by ultimate consumers
	through storage enable, middlemen to
	ensure continuation of production to producers
	and also enables to reduce and minimize
	supply irregularities to consumers: - also
	its among their role lastly:

२०	Prepares Goods For sale; - also middlemen can
	prepares goods for scale they undertakes to
	brand goods, packaging, blending and grading
	which in turn increase and stimulates the
	have its also accept to ultimate consumers
	hence its also among their note.
	Despite of their roles in distribution
	process but also can lead to the mise in
	prices of goods supplied by them also can widens
	distribution channels which in turn can are
	reeded to be eliminated.
20	Man 130 22
- RB	Mercantile agents 1- These are agents
	who works on behalf of others called
	"principale" The following are the kinds of
	Mercantile agents
	Commission Agents; These are
	mercantile agents who buys and sells goods
	on behalf of their principals but undertakes
	to huy and rell goods on their own names
	upon agreed commission. They possess the goods
	they self also have authority to receive
	charges for the goods on behalf of their
	Principale
	Brokers: These are mercantile agents
	who negotiates purchase or sell goods without
	physical handling of the goods . They do not
	tell or possess goods they sell also can
	act in both parties whether a boyer or seller,
	also their main function is to facilitates close
	contact between a biver and will all some for
	are paid brokerage charge for undertakings thase

functions.

₹6	Factors; - These are mercantile agents who
	sells goods consigned or delivered to them on behalf
	of their principal (sender of goods). Also factors
	sells goods on their own names also can flx prices
	of goods on their own and also are authorized
	to receive charges on behalf of their principals,
	also factors can sue or be need according to the
	contracts entered with his principal.
	Auctioneers: These are mercantile agents
	who sells goods on public auction: They usually
	sell goods on each havis to the highest bidder
	of goods are mainly involved in selling
	second-hand goods, or repossered goods on behalf
	of their principals.
	Lastly Delcredere Agents; - These are mercantile
	agents who rells goods on behalf of their
	principals and undertakes to guarantee a
	seller (his principal) to pay for the goods
	when loss occur on goods supplied (sold) by
	them on bearing that risks are paid
	extra commission coulled descredere commission.

Extract 2.1 presents a sample from a script of a candidate who performed well in both part (a) and (b). This candidate managed to explain the role of middlemen in distribution process and elaborated five kinds of mercantile agents.

The candidates with average performance; that is, who scored from 6 to 10 marks, managed to explain at least three roles of middlemen in distribution process and mention other roles without giving explanations or provided explanations which did not relate with the roles mentioned in part (a). In part (b), many candidates in this category failed to distinguish between del credere agents and commission agents. The main difference between the two kinds of agents is that, commission agents buy and sell goods for the principal but not taking the risk on such goods in case of any default of the customer whereas del credere agents perform the same task

but they are liable for any default from the customers introduced by them hence paid with additional amount for taking the risk.

The candidates who scored from 0.5 to 5.5 marks did not have sufficient skills and knowledge about middlemen and the mercantile agents. In part (a), most of these candidates identified the common role of middlemen which is to act as a link between the parties. It was possible for the candidates to remember such a point because under normal circumstances in the channel of distribution goods have to pass through different steps to reach the final consumers and a person who links the parties is called a middleman. However, in part (b), some candidates did not understand the term mercantile agents and therefore they elaborated some types of wholesalers. Other candidates' descriptions focused on traders involved in distributing the goods and services to the final consumers such as manufacturers, wholesalers, large scale retailers and small scale retailers which were contrary to the demands of the question. However, they were able to provide correct elaborations to some mercantile agents for example brokers, del credere agents.

The candidates who scored a 0 mark failed to identify the task of the question and therefore presented irrelevant responses such as types of traders involved in home trade, functions of wholesalers while others described the qualities of a good retailer. Extract 2.2 shows a sample of a poor response.

Extract 2.2

2)	Merrante agents are organts
	that rell goods ander their own parsais. The following ove the frex Kirds of marcantile
	possession or well of trees own warres. The

	a lot with for.
	a let with for. Westration. Their hind
	products all over the maton. They are
	graduets all over the nation. They are
	by wholesakes who have phosty of capital

Extract 2.2 shows a sample of part of a response from a script of a candidate who scored a 0 mark. The candidate failed to interpret the question in part (b) and hence elaborated the types of wholesalers instead of the kinds of mercantile agents.

2.1.3 Question 3: Production

The question had two parts, (a) and (b). In part (a) (i), the candidates were required to analyse four types of utility and in sub part (ii), they were required to give two reasons as to why some countries are involved in specialization. In part (b), they were required to examine four advantages of specialization to an industry.

The question was attempted by 1000 candidates (96%) of which 24.8 percent scored from 16 to 20 marks, 60.2 percent scored from 10.5 to 15 marks, 13.8 percent scored from 6 to 10 marks and only 1.2 percent scored from 3 marks to 5.5 marks. The overall performance in this question was good.

The candidates who scored from 10.5 to 20 marks were able to analyse the types of utility by providing correct responses such as time utility, form utility, place utility and possession utility and give the reasons for a country to specialize which include different in natural resources, climatic condition, skills, science and technology, availability of capital and market for the goods/services produced. In part (b), they explained the advantages of specialization to an industry and their points were: increase in production and quality of goods produced, efficient and effective, reduce cost of production, promote the use of machines, increase in skills and time and energy saving. A few candidates explained at least three correct advantages and some of the general advantages of specialization which were not applicable to industry such as degree of choice which is in particular useful to workers. However, some candidates in this category failed to provide correct reasons for a country to specialize instead they wrote the advantages of specialization. Extract 3.1 shows a sample of a good response.

Extract 3.1

3/4/h	Ultily report to the ability of goods and	
	services to satisfy human hoods. Therepore univity is	
	the sakistication that a person outin from the	
	constamption a a particular goods or sorvings.	
	The following are the types of whity.	
	Form unfully, this is the salterflation that	
	is gained or obtained when raw materials are	
	transformed in m finished goods forexumple when	
	cotton is transformed into dottes.	
	Time univity. This is the sakstication	
	that B obtained when goods and services one availa-	
	the when people need them at a particular period,	
	forexample during rain season when there's	
	umbrella we can say there's hime un'ulty for umbrella.	
	Place whilly. Also this is the salisy carbon	
	that is gained when goods are available at a	
	particular place that is at the market where austranon	
	can get their requirement.	
	Possession unity. This is the satisficali-	
	on that is gained when goods are sold from one	
,	person to another and take the title of the goods apid.	
	This sulf exication is mostly obtained throught actual	
	buying a goods and sometimes known as ownership	
	uhivity	

3a(i)		
	a conuntrating in doing a dertain activities that	
	a penon or a country can do the best than any other.	
	The following are the reasons for some countries	
	to involve it self in spenalization.	
	Resources reasons. A country	
	may decide to specialize in production of a particular	
	commodity because of the resources one highly avail-	
	able in the country forexample due to the high	
	availability a skilled labour force, rahiral resources,	
	good diman's condition and geographical location.	
	Forexample Malani non spenalized in productions	
	tea due to the resources reason.	
	Economia reason. Also country may	
	devide la specialize in a particular commodity que	
	to the existance of absolute advantage and comparative	
	advantage inorder to gain in the international trade.	
	A country may specialize in a particular product	
	when it can produce such commodify at highly	
	quantity but at low cost or cheaply compared to	
	other country, or it can spenalize in such	
	commodity because a low opposition in that	
	commodify because a low opportunity and mat it can incurre forexumple Tanzania has specialized	
	In extraction q minerals of Tanzanite because it	
	cannot be found else where, that is absolute	
	COLLINOL RA HOULING SIZE EMPER THAT IS dissource	
	advantage.	

3(b)	Specialization leads to a number q	
	advantages to an industry and even to me	
	country in general, the refore the sollowing are the	
	advantages a specialization to an industry.	
	advantages of specialization to an Industry. Larger output and of high quality.	
	when an industry specialize in a particular	
	commodity that it can do best man production other	
	thing it will result into more output to be prod-	
	uced by the labourers and workers which have been	
	employed and the output will be of fright quality.	
	The use of machinery, spenairianon	
	lleads to the reportation of a particular activity	
	In My production process, there have due to more	
	repeatation of the same activity workers many	
	repeatation of the same activity workers many discover a machine that can simplify their	
	task in operation and leads to advantage to the	
	indushy.	
	Save time and energy speudnak-	
	on suno himse to all workers who one engaging	
	in a such particular production process because	
	workers don't overwork Themselves in doing meir	
	task but sperate only to their respective specialized	_
	area therefore production in the industry tend to be	
	done faster at a short period of hime and sure the	
	energy of the workers.	
	Devolop skills and experience.	
	Speualization enable a worker to recrease his or	
	her experience and skills in the production process which result into effect and expective utilization of their labour potentials and leads to	
	which result into effect and effective represent	
	non a meir labour potentials and loads to	
	The winefit in the industry.	

Extract 3.1 shows a sample of a good response from a script of a candidate who managed to analyse the types of utility, explain the reasons for a country to be involved in specialization and examine the advantages of specialization to an industry.

A few candidates who performed poorly in this question had their scores ranging from 3 to 5.5 marks. These candidates provided weak explanations on some advantages of specialization to an industry and failed to analyse types of utility in part (a) (i) and the reason for a country to specialize in part (ii). Others listed the advantages of specialization without explanations. There were also candidates who misinterpreted the question in part (a) (i) by explaining the factors of production such as land, labour capital and entrepreneur which are completely incorrect. In part (a) (ii), many candidates responded incorrectly by mentioning the advantages of specialization instead of the reasons for specialization. A few candidates who also misinterpreted part (b) elaborated the advantages of specialization to the community which was contrary to the demand of the question and their response were employment opportunity, economic development to the people and increase of individual and government income even though they pointed out few correct points in part (b). Extract 3.2 presents a sample of a poor response from a script of a candidate who failed to understand the demand of the question. The candidate also failed to express himself/herself clearly due to a poor mastery of English Language.

Extract 3.2

3@ i/ Utility 15 the ability of the product to satisfy huma
n wants.
There are types of whity. These are
There are types of whity. These are Hospital whity are the whites that satisfy human

increase production According to the simplified
work the productivity of work increase due to the
increase in efficiency.
The above wethe two reasons for specialization!

6 Specialization is the process of simplification
of works/jobs into a numbers by dividing each
mulaer with a one person doing their works.
When we specialize the work we Can getstle
following advantages.
Industry is the point/unity where by exchanging
of raw material into timested goods are conducte
d/Carried out.
Advantages of specialization to an industry.
· Increase imployment-when we specialize
works we promote the opportunities of works there
for resulted to increase labour.
Expansion of the market : This is due to the
increase of productions that was coused by emplo
ying a number of labours.
Increase production. The industry increase
production due to expansion of market and increa
se efferency of working.
No mobility of labour. Due to the simplification
n of work Labour done work without tried and
enjoy to do work without moving from one ind
ustry to another.
on top of that the above explanations
are the advantage of specialization to an India
Sty.
i i i i i i i i i i i i i i i i i i i

Extract 3.2 shows a sample of a poor response from a script of a candidate who wrote on human basic needs with incorrect descriptions in part (a) and the advantages of specialization in the same parts instead of giving reasons for a country to specialize. In part (b), he/she mentioned some correct advantages like increase production and market expansion with incorrect explanations.

2.1.4 Question 4: Transport and Communication

The question had two parts, (a) and (b). In part (a), the candidates were required to explain five disadvantages of pipe line transportation while in part (b) (i) they were required to differentiate internal communication from external communication (ii) explain the merits of good external communication in an organization.

The question was attempted by 736 candidates (70.6%). The general performance in this question was good because 6.2 percent scored from 15.5 to 19.5 marks, 57.4 percent of the candidates scored from 10.5 and 15 marks, 31.4 percent score from 6 to 10 marks and only 5 percent scored from 3 to 5.5 marks.

The candidates with high marks (10.5 to 19.5) were able to examine the disadvantages of pipeline transport in part (a) and provide correct distinction between internal communication and external communication with some examples. Moreover, they explained the advantages good external communication in an organization such as widening the market, create business reputation, good public relation, to know customers demand and their complaints. The candidates' performance in this category differs due to varied abilities in clarifying the points. Extract 4.1 presents a sample of a good response.

Extract 4.1

Extract 4.1 presents a sample of a response from a script of a candidate who managed to examine the disadvantages of pipeline transport, differentiated internal communication from external communication and explain the merits of good external communication in an organization.

The candidates with low scores (3 - 5.5 marks) were able to outline few correct disadvantages of pipeline transport with inadequate explanation. Others in this group were able to differentiate internal communication from external communication but failed to explain the merits of external communication in an organization since their explanations focused on the advantages of internal communication such as motivating staffs, improve understanding between employer and employees and it increase efficiency. Some candidates were able to explain few points on the advantages of good external communication like facilitating expansion of the market and increase in quality of products but failed to respond correctly on the other parts. The variation of marks had been contributed by a number of factors like inadequate explanation and less number of points. Extract 4.2 and 4.3 are samples of responses from the scripts of the candidates with poor performance in part (a) and (b) respectively.

2.1.5 Question 5: Advertising

The question had two parts, (a) and (b). In part (a), the candidates were required to explain five forms of outdoor advertising and in part (b) they were required to describe six benefits of trade fair and exhibition to both businessmen and customers.

The question was attempted by 289 candidates (27.7%) of which 9 percent scored from 15.5 to 19 marks, 38.1 percent scored from 10.5 to 15 marks, 32.8 percent scored from 6 to 10 marks and 20.1 percent scored from 1 to 5.5 marks. The data shows that the performance in this question was good.

The candidates who performed well (10.5 to 19 marks) in this question were able to produce correct answer in both part (a) and (b). Many of them managed to explain the forms of outdoor advertising with some examples in part (a). They also managed to describe the ways in which businessmen and customers benefit from trade fair and exhibitions and their responses include widening the market to producer, widening choice to customers, facilitate introduction of new line product to the market, creating good relationship among the members and customers can buying goods at low price (advertisement price). Extract 5.1 presents a sample of a good.

trade fair and exhibition to loth burnessmen and
cuhmen.

Extract 5.1 shows a sample of a response from script of a candidate who managed to explain the forms of outdoor and the benefits of trade fair and exhibition to both businessmen and customers

The candidates who scored low marks (1 to 5.5) provided partial explanations to some of the points, mixed correct and incorrect points, for example, in part (a), where some candidates wrote on different advertising media such of television, radio, window display and poster and neon signs. They were, therefore, awarded marks for mentioning posters and neon signs which are among the outdoor advertising. However, some of them were able to describe few correct points in part (b). Furthermore, some candidates managed to explain few points on outdoor advertising in part (a) but they did not score any marks in part (b) and the vice versa. Some candidates misconceived part (a) of the question because

they explained the categories of advertising such as informative, generic and persuasive advertising instead of outdoor advertising or methods of sales promotion such as price reduction, free samples, use of window display and use of gifts and prizes. Many candidates in this group skipped part (b) of the question and a few who attempted it explained about advertising media such as television, magazine, posters and radio. Extract 5.2 1 is a sample of a response from a script of a candidate who performed poorly.

Extract 5.2

advertising.
People make advertising must
to know the people used to make adwert sing.

Extract 5.2 shows a sample of a response of a script of a candidate who scored low mark by mixing correct point with incorrect points. This candidate wrote irrelevant points among them are factors to be considered when choosing advertising media (a). Besides, the candidates failed to elaborate the points due to poor mastery of English Language.

2.1.6 Question 6: Warehousing

The question had two parts, (a) and (b). Part (a) had three sub parts (i), (ii) and (iii) whereby in (i) the candidate were required to identify four levels of stock held in the warehouse, in (ii) they were required to calculate the order point from the data given and in (iii) they were required to explain why is it necessary to indicate the delivery time in the calculation of order point. In part (b), they were required to analyse the procedures necessary for storing and removing goods from the bonded warehouses.

The question was attempted by 249 candidates (23.9%) of which 1.4 percent scored from 10.5 to 16.5 marks, 23.1 percent scored from 6 to 10 marks and 73.5 percent scored from 0 to 5.5 marks. The statistical data shows that the performance was poor.

The majority of the candidates (71.9%) scored low marks which ranged from 0.5 to 5.5 depending on their ability to respond on the concepts tested in part (a) and (b). Some candidates attempted part (a) (i) by identifying some levels of stock such as minimum and maximum stock levels but failed to identify the other levels like average stock and reorder point level. Very few candidates in this category managed to compute order point, while majority failed either to apply appropriate formula or observe the instructions given in (a) (ii) and hence they obtained incorrect figure and also failed to analyse the procedures as required in (b).

Furthermore, some of them explained some documents used in international trade like bill of lading, customer duties, freight note, and indent. The reasons for their response could be influenced by the fact that customers have to clear the duties and other charges before goods leave the bonded warehouse. Some candidates analysed the functions of stock administration. Extract 6.1 is a sample of a response from a script of a candidate who performed poorly in part (a) (ii), (iii) and (b).

Extract 6.1

610)	(ii) Mimmum utock =0 850 x 50 = 42,500	
	Duily vales = 12,500	
	Time to deliver = 12 days	
	Order Point = (Daily sales x Time to deliver) - Minimum stock	
	= (12,500 x 12) - 42,500	
	= 150,000 - 42500	
	= 107, 500	
	Order Point = 107,500.	

6(a)	iii) The delivery time is necessary to indicate in the calculation
	of order point because it helps to whow the exactly time at which
	the goods will reach to the warehouse
6(b)	PROCEDURES NECESSARY FOR STORING AND REMOVING
	GOODS FROM THE BONDED WAREHOUSE
	Bonded womehouse is the workhouse owned by enterprise
	austom authorities or joint stock componnes to store the goods of people or
	traders. They are licensed and controlled by the Government at Large And
	they are useful to imported goods for storing untill the autom duty is paid.
	The proadures necessary to storing and removing goods from the
	bonded womehouse are as pollows:
	Receiving the goods, a bonded womehouse keeper is obliged
	to receive the goods cycloaded in the womehouse. The information of the arrival
	of the goods must be passed over earlier. So during the rectiving of
	goods there are legal document that are checked like Receipt and on
	Control of stock / Checking of stock, before placing the stock
	a womehouse keeper do check the stock, ventying them and oxing
	them not jurther reference when they one kept in a proper Layout. This
	will help during the stock taking activities
	Placing of stock, as this point stock is placed or
	kept at the required place accordingly with regard to its nature, the
	type or good and so on.
	Receiving of womehousing changes. When a person wants
	to remove his their goods out of bonded womehouse, there are
	changes that must be encountered. Normally ouston duty is paid
	Preparation of necessary documents, during the removal of
	stock or goods in a warrehouse there one documents which one
	prepared and signed forexample despatching books and so on so
	after the completion of these documents goods are despatched.

Extract 6.1 shows a sample of a response of a script of a candidate who scored a 0 mark. The candidate failed to compute reorder point and explained the functions of stock administration instead of analyzing the procedures necessary for storing and removing goods from bonded warehouses.

Most of the candidates with average marks (6 to 10 marks) managed to provide relatively correct answers in part (a) but they skipped part (b). A few candidates among them attempted part (b), but they mixed up some storing and removing procedures. However, most of them were able to provide partial explanation on the first procedure of storing the goods in bonded warehouse which state that goods must be taxable goods. The variation of their scores depending in the strengths of the points presented by the candidates..

The candidate who performed well; that is, scored from 10.5 to 16 marks, were able to respond correctly in part (a), and analyse some procedures of storing goods in bonded warehouse in part (b). No one managed to analyse all the procedures correctly. Extract 6.2 shows a sample of a good response from a script of a candidate who performed well in part (a).

Extract 6.2

La distribution of the state of	
i) The tellowing we to level so that held in the aximum.	
is Muximum stack lovel; is a lovel of stack beyond which

	,
	., Order Paint = 142,500kgs = 50 kgs
	= 3850 bags.

Extract 6.2 shows a sample of a response of a script of a candidate who managed to identify four levels of stock held in the warehouse and calculate the order point.

The correct procedures identified and described in part (b) were:

Storing procedures:

(i) Imported goods must be checked and proved that they are dutiable, custom duties had not been paid and proved that goods are not needed for immediate consumption.

- (ii) The owner of the warehouse ensures that the goods will not leave the warehouse before the payment of the custom duties clearance.
- (iii) Importer has to prepare an entry for warehousing and landing order in order to be allowed to deposit the goods in the bonded warehouse.
- (iv) After the entry has been examined by the custom officer the landing order is signed and sent to the bonded warehouse, then the goods are allowed to be kept in bonded warehouse.

Removing procedures

- (i) When the importer needs to deliver the goods from the warehouse he/she has to prepare and fill in a bill of entry and has to pay the duty.
- (ii) Importer often takes sometimes to arrange for payment of custom duty and has to pay also storage charges in the bonded warehouse.
- (iii) After clearance of the custom duties and storage charges the imported goods will be released to the importer on the presentation of a warehouse warrant to certify that the duties have been paid.
- (iv) The custom authority allows the importer to take delivery of the goods in bond after confirmation that the relevant duties have been paid.

2.1.7 Question 7: The Scope of Commerce

The question had part (a) and (b). In part (a), the candidates were required to define the term trade and describe its branches and in part (b) they were required to discuss how aids to trade facilitate trade

This question was attempted by 1,024 candidates (98.3%) whereby 38.5 percent scored from 15.5 to 20 marks, 54.7 percent scored from 10.5 to 15 marks, 6.6 percent scored from 6.5 to 10 marks while only 0.2 percent scored 4 marks. The candidates' performance in this question was good because the majority of the candidates (93.2%) performed well.

The candidates who scored high marks in this question were able to define the term trade, describe correctly its branches and discuss how aids to trade facilitate trade with relevant examples. Their explanations showed that they had sufficient knowledge on the subject matter. However, very few candidates failed to describe some of the branches of trade like insurance and warehousing, they confused the warehouse from warehousing. Besides, the good performance could be attributed to the fact that the concept tested covers many topics taught in Commerce. Extract 7.1 shows a sample of a good response.

Extract 7.1

	,
07. a) Trade is any activity that involves buying and	
selling of goods as well as provision of services for the	
purpose of generating profil. Trade is the branch of the	e
commerce which. Any activity carned out for the purpo	re .
of rahitying needs of a person without yielding into	
cannot be termed as trade.	
Trade also has it's branches in which through	gh
those branches, one is able to fully group the wneept	
of hade There are only two branches of trade with	
their reb-branches.	
Home trade this is the buying and selling	
of goods and services within the worthy and not acc	10m
the borders. It can involve (regional hade), between rec	iòns
of the same country, or between districts but it has	to
be the same country. It has two sub-division w	hich
a.e.	
Retail trade to the buying of goods from	
wholesalers or manufacturors and solling them to the p	inal
were in apportable quantities. Retail trade can at time	\$
be done by wholesalers or even manufacturors so long o	u
goods are sold to the final consumers. It may involve	·e
Small scale retailers and large scale retailers, non-store	
and involve retailers, and so forth.	
Wholesale trade, Is the buying of goods from manyactures in large quantities and selling them to	
manyaction in large quantities and selling them to	
retailed in small quantities. They has been arguments	
as to it wholesalers should be eliminated or not the	•
tracters bridges the gap between producers and retails	rı
but also can pupar goods for sale.	
The second branch of trade is Foreign	
hado Is the buying and selling of goods across	
the borders. It involves more than one country.	

60	a) It can be between two countries (bi-lakeral) or
	more than two countries (multi-lateral). Foreign
	trade can be between China and Tanzania, or Tanzania
	a, Japan and Kenya. It has three sub-divisions:
	Export hade to the selling of goods to other
	countries Fouxample Tanzania can sell Tanzanite to
	Japan, or Japan can sell many particul products
	to Tanzania. Export trade can be a causative of
	javourable balance of payment, it it exceeds import
	hade.
	Import hade Is the buying of goods and services
	from other countries. Forexample lansania can buy
	manufactured goods from Dubai, or from China, Hus
	conducting importation. Imports can add varieties of
<u> </u>	goods and hence subsity consumers requirements.
	Entraport trade, & The re-exporting of already
	imported goods A country may buy goods from another
	country and later on sell them to dnother country.
	Forexample Taniania may buy goods from Japan, and
	then well them to Kenya. Thus conducting entroport
	trade.
	Trade wichen the study and growth of commerce
	around the globe, with the help of other romies like
	transport and communication, banking and Invurance.
	b). Aids to hade are services that helps to
	facilitate trade, or services that smoothers the running
	of trade to make trade our smoothly and exprisently
	Aids to tracte is a branch of commerce. Aids to trade
	facilitates track through the holp of it's various
<u> </u>	Senses it often and function each sense Performs.
L	I agraiged in affect only Danvilon early Towner Laborers

07 b) of good by fire, or theft, or fraud by employed	
people and thus assuring traders to carry on their	
activities without worrying on the collapse of their	
businessos. Thus by during so inverance facilitates hade	
because in any case a loss occurs traders are assured	
to be voutored in their pormer paritions.	
Wavehowing, this service involves storing of	
good in specialized buildings, and dispatching them	_
when required by tracters or other individual for sale.	
Warehowing facilitates trade because through it	
hadrousing factifical track because invogent	
traders are assured of safety from bad weather	
conditions of their products, but also they can look	
for market when goods are still stoud and also	
good can add value while being whored thus earning	
targe income, through were housing.	_
Advertising, This services is a non-paid form	
of communication that intends to inform, remind and	
peruade potential buyers to buy products and thus	
by doing so pacilitates trade Because on a cons	
umes become aware of artain goods in the	
market they can be consided and attracted to acquire	
then for sahizaction of ge wants, and they by	
doing so inclease the volume of rales, for trades.	
Aids to trade has been a greater inpluence	
in the growth of commerce worldwide and the	
growth of other related subjects of the vane	
nature such as economics	

Extract 7.1 is a sample of a good response from a script of a candidate who managed to define the term trade, describe its branches and discuss how aids to trade facilitate trade.

Only 0.2 percent of the candidates scored 4 marks which was the lowest scores in this question. One of them misinterpreted part (a) of the question and wrote on the terms of trade and its forms instead of defining the term trade with its branches. However, they managed to discuss few points on how aids to trade facilitate trade, for example, banking and warehouse in part (b). The other candidate managed to define the term trade and mentioned some of its branches in part (a) such as home trade and foreign trade while in part (b), he/she was able mention some aids to trade like insurance and communication but failed to show their roles in trade. Extract 7.2 is a sample of a response from a script of a candidate who answered the question incorrectly in part (a).

Extract 7.2

7. (a) Terms of trade is a state or situation	
of a country which involves itself in international trade	
whether its getting profit or loss either balancing. This result	
from a country allowing free trade and discouraging the	
closed economy hence it brings about good relations among	
countries. Texus of trade however contributes in stating how	
the economy of the country benefits from international	
trade. As it can be beneficial or loss, terms of trade has	
the following branches.	
· Favourable terms of trade. This is a branch	
of terms of trade where individual country's exporting of	
goods exceeds the importation of goods hence benefiting	
the country in international trade Favourable terms of	
trade result to favourable balance of payment where	
the receipts from international trade exceeds payment	
that is the imports. For example Tanzania may export	
much coffee than it imports other goods as Tanzania	
benefits hence experiencing favourable terms of trade.	
Unfavourable terms of trade. Also, this is	
a branch of terms of trade where a country's exports	
is less than the imports hence being dependent on	
goods from other countries, however the countries receipt from international trade seem to be less than payment	
from international trade seem to be less than payment	
hence having unfavourable balance of trade. This state dis-	
Curage local inclustries leading to collapse hince threaten	
the country's economy. This is common in less developing	
Balanced terms of trade. However, the	
importation of goods and exportation may seem to equality	
Ze as being at the same rate, this give rise to balanced	
terry of trade giving rise to balanced balance of trade	

Extract 7.2 presents a sample of a response from a script of a candidate who defined 'terms of trade' with its forms instead of defining the term trade and describes its branches.

2.1.8 Question 8: Banking.

The question had two parts (a) and (b). In part (a), the candidates were required to explain the impact of privatization of banks in Tanzania by giving five points while in (b) they were required to analyse five features of a current account.

The question was attempted by 754 candidates (72.4%). The candidates' performance in this question was good as 16.3 percent scored from 15.5 to 19.5 marks out of 20, 42.6 percent scored from 10.5 to 15 marks, 29.3 percent scored from 6 to 10 marks and only 12.1% percent scored from 0 to 5.5 marks. Such good performance could be attributed to the fact that the issue of privatization of banks is part and parcel of liberation policy adopted by the government and discussed and exposed in different media such as television, newspapers, radio, and magazine and trade journals. On the other hand, the donor community attached bank privatization to the conditions for granting loans. Therefore, it is possible for the candidates to be aware of the impact of bank privatization of banks in Tanzania.

The candidates who scored high marks in this question had their scores ranging from 10.5 to 19.5. Some of them managed to explain the impact of privatization of banks in Tanzania in part (a) and analyse the features of current account in part (b). Most of them were able to explain at least three points out of the required five in part (a) including creation of employment opportunities, increase of investment, increase government, competition, and citizens enjoy part of the profits. Moreover, some of them managed to analyse the features of a current account in part (b) as shown in Extract 8.2. Extract 8.1 and 8.2 are the samples of good responses in part (a) and (b) respectively.

Extract 8.1

80 Privatization is the situation where by the
government decircled to sell it assets and enterprises to
private individual or companies. The private when of
Canks in Turrania has bring the following unpails to
the country.
Increase efficiency in banks operation; efforcing
have been inexected in operation of bunk become there
is competition in a market and everyone want towin
the market . So they are always continuing in privaling
better servici.
Introduction of new technology; new technology
from abroad Wke miney Country maduril, debit and,
Gredit courd, Atm machine house been introduced after
privationation because the government was unable of bring-
ing's all these things.
Competition due to establishment of mure banky;
before provation of banks in Tamania there were a
few banks in banking industry because private company
and undividuals were not allowed but now there is many
bank whe ACB, KCB, Ameuna, CRDB, MBC etc
Cleation of more employment opportunity in karling
industry; many peoples are employed in bankung indular
than before due to writinduction of privatiration which
led to establishment of many banky which need
workers like Accountant, Transficors, Taller Etc
Development of commerce and trade; commerce which
Include exchange of goods and dutibuliation have been
grow due to provatization of banks which red to
inerease in number of bank even in nural circa

Extract 8.1 presents a sample of a good response from a script of a candidate who responded correctly on the question on the impact of privatization of banks in Tanzania.

Extract 8.2

Walter Carlotter

Extract 8.2 presents a sample of a good response from a script of a candidate who managed to analyse the features of current accounts.

On the other hand, a few candidates with low performance managed to mention and explain at least few points in either part (a) or (b) or both. The majority of them were able to identify some features of a current account in part (b) as compared to their response in part (a). This shows that most of the candidates in this group had inadequate knowledge on banking in relation to privatization. They even failed

to link privatization of banks with the reality in our daily life as compared to the previous era for example, with the increase in banking services to customers, customers may get bank services even over the week end or through their mobile phone at any time.

However, there were some candidates who scored a 0 mark because their points did not relate with the subject matter, some of their discussion revolved around the impact if banks were not privatized such as poor banking services, high rate of interest on loan, lack of employment opportunities, and decrease in production which was not the task of the question. Other candidates attempted only one part of the question of which they provided incorrect answers too. For example, in part (b) some candidates explained the functions of commercial banks instead of features of a current account. Extract 8.3 presents a sample of a poor response from a script of a candidate who scored low marks in part (a) while Extract 8.4 presents a sample of poor response in part (b).

Extract 8.3

Extract 8.3 shows a sample of poor response from a script of a candidate who scored a 0 mark by writing the functions performed by the bank to the current account holder.

2.2 Paper 2

2.2.1 Question 1: Business Units

This question had two parts, part (a) and (b). In part (a), the candidates were require to explain how Co-operatives help agricultural development in Tanzania by giving five points and in part (b) they were required to evaluate five common characteristics of both private and public limited companies.

The question was attempted by 1,042 candidates (100%) as it was a compulsory question. The performance was good as 10.2 percent scored from 15.5 to 19.5 marks, 50.9 percent scored from 10.5 to 15 marks, 34.1 percent scored from 6 to 10 marks and only 4.8 percent scored from 0.5 to 5.5 marks.

The candidates who scored high marks (10.5 to 19.5 marks) provided detailed explanations in part (a) with some examples and could evaluate some characteristics as required in part (b), however their marks differ according to their ability to explain the correct points mentioned. Moreover, some candidates managed to answer the question with partial explanations to some of the points.

The majority of them explained the ways in which co-operative society assist the development of agriculture their responses include provision of storage facilities, they supply farmers with agricultural inputs at free or reduced price, provide advice to farmers on how to produce and what to produce, they assist farmers in transporting their produce to the market, assist them getting better price for their produce. Furthermore, they were able to evaluate at least three characteristics as required in part (b). The majority of the candidates in this group were able to evaluate the characteristics like perpetual existence, legal entity, registered under companies Act with the world "Ltd", liability of the shareholders may be limited or unlimited and they provided relatively correct explanations. Extract 1.1 shows a sample of a good response from a script of a candidate with high score.

Extract 1.1 represents a sample of a response from a script of a candidate who managed to explain how co-operatives help agricultural development in Tanzania and evaluate the common characteristics to both private and public limited companies.

On the other hand, the candidates whose marks ranged from 1 to 5.5 showed little knowledge on the demands of the question. Some of them mentioned some correct points in part (a) and (b) with shallow explanations. However, a few candidates deviated from the question's demand by pointing out the difference between private and public limited companies, for example, number of members required in the formation of the company, ownership, and transferability of shares, others wrote some points which did not relate with the demand question in part (b) like they all make profit, produce goods and services to customers.

2.2.2 Question 2: Foreign trade

The question had two parts (a) and (b). In part (a), the candidates were required to differentiate different documents used in international trade (i) Certificate of origin and an Indent, (ii) Shipping note and Dock warrant, (iii) Letter of credit and Letter of hypothecation, (iv) Bill of lading and Airway Bill and (v) Profoma invoice and Freight note. In part (b), they were required to explain five methods employed to correct deficit balance of payment.

This question was attempted by 932 candidates (89.4%), of which 16.7 percent scored from 15.5 to 20 marks, 39.6 percent scored from 10.5 to 15 marks, 36.2 percent scored from 5.5 to 10 marks, and only 7.5 percent scored from 0 to 5.5 marks. The candidates' performance in this question was good.

The candidates with high performance (10.5 to 20 marks) managed to differentiate the terms and could explain the methods used to correct deficit of payment however, their explanation were clear and majority managed to meet the required number of points. However, in item (iv) they explained bill of lading with correct description but failed to explain airway bill they noted it as amount paid for fare air plane to a passenger. Extract 2.1 is a sample of a good response from a script of a candidate who performed well in this question.

Extract 2.1

Shows the orgin of the goods. The Certificate of Orgin Shows the details about the name of the product, quantity of the products and where the product is made or comes from while An indent — Is the an international trade order of the goods to be imported by the importer from the experter's country. 	The following are the methods to correct the deficity	
	in to belance of paymet.	
	Import tarrifs. This is the control of import	

2(5)	by imposing high import tax. This will discourage e imports and strimulate export.
	e imports and strimulate export.
	Devaluation of annay. When the annay
	is developed the much money will be paid when impo
	rting Ito goods and Low amount is paid when our
	porting the goods . Thus will stringle mexport.
	Export promotion. He government should
	Domote export by reducing the export tex and
	tarriff many people will engage in production.
	The export will exceed import hence balance
	of payment.
	Subsidization of local industries. The gook
	rment and commercial banks should give subsid
	es to the local inclustries so as to product good
	S for exportation this will stimulate export
	and hence favourable balance of payments
	Import substitution Industries. The govern
	ment should establish industries which produces
	the goods which was formerly imported. This
	cond discourge import and stimulate export
	and here Favoureble balance of payments.
	Generally, Inorder to inchase export
	and discouraging imports the above ways are
	and discouraging imports the above ways are to be considered, when the above factors
	are considered the country will develop the
	favourable balance of payment or a balanced
	term of payments in the economy.

Extract 2.1 shows a sample of a response of a candidate who managed to differentiate the terms and explained the methods employed to correct deficit balance of payment correctly.

On the other hand, some candidates scored low marks (1 to 5.5) because they attempted only one or two items in part (a) and provided few correct points in part (b). Some candidates failed completely to differentiate the terms, they confused some of the terms, especially letter of credit and letter of hypothecation they interchanged the descriptions on the terms but they managed to explain few points on the methods to correct deficit balance of payment. Extract 2.2 is a sample of a poor response.

Extract 2.2

Extract 2.2 shows a sample of a response from a script of a candidate who failed completely to differentiate correctly any of the term in part (a) but in part (b), he/she mentioned some points which relates with the correct responses even though failed to provide the correct explanations.

2.2.3 Question 3: Organization and Management of business

The question had part (a) and (b). In part (a), the candidates were required to analyse the task performed in staffing as a function of management in the firm by giving six points and in (b), they were required to explain why planning becomes an important function of management.

The question was attempted by 758 candidates (72.7%). The overall performance in this question was good since 8.6 percent scored from 15.5 to 20 marks, 36.8 percent scored from 10.5 to 15 marks, 30.7 percent scored 6 to 10 marks, and 23.9 percent scored from 0 to 5.5 marks.

The candidates who performed well; that is, who scored from 10.5 to 20 marks, demonstrated good understanding on the concepts tested by providing relatively correct responses to the question. They managed to explain at least four tasks out of required six in part (a) which includes job analysis, recruitment, selection, placing, training and motivating and awarding of the employees and many of them were able to explain some correct points like avoiding risks, proper use of resources and attaining the objective in part (b). However, variations in their scores were caused by the number of correct points and the strengths of their explanations. Extract 3.1 presents a sample of good response.

Extract 3.1

Extract 5.1	
Gh.3 Staffing, a punction of management which is	
concerned with human resources as per requirements of the	_
organization. To put the appropriate human resource in the	
regrated position in the firm. There are tasks perpend in	
Staffing, these are as follows.	
Man power planning. This is one away the	
tacks prepared to in staying it involves knowing the require	
mouts of the firm with en respect to human resource	
It is snuply the job analysis; and identification of inorter	
required at different deportments	
Recrustment, selection, and placing. This is another	
group of tasks and purctions of staffing unvolved with	
toping vorious resources of workers availability, selection	
of the best out of the many alternatives and placing the	
relected to the required position before their induction	
Training and promotion. Training and making the	
workers used to job allocated to them, furthermore their	
promation from one level to another, this will enable this	
better perfermence and futhermore incentive for their	
wo rang	
Appraisal and evaluation of performance.	
This task is concerned with measure of projouduce	
of the workers a with respect to the goals, standards	
and agreements set. It involves taking corrective	
measurer & in case of any ineffectionary in projourance	
and more to shoulake better personance. It's	
querally concerned with the composison of current	
personance and general objectives.	
Rammeration of michies payment to the	
Staff numbers Guply the payment of workers	
according to woges or salances futhermore	
they are paid occordingly to the agreement	

l		
30°	any justier increased amond could be declared	
	Lostly Motivation. This involves the	
	influencial and inspiring task of making staff /workers	
	be more productive and effectant morder to merease	
	their effectioner in work.	
	, and the state of	
b/	Planning, This is the analysis of past and	
	present situation and information of an organization	
	and assessment of probable jutice for purpose of	
	affaming a goal of the organization. Planning is essentia	
	in an management due to the following.	
	Offset uncertainty. Through planning in	
	management, the element of succertainty due to lack	
	of assurance, analysis and assessment of management	
	and organization goal is eliminated. Through planning	
	the organization is certain that a certain specific things	
	will be done as per probable putures	
	Economic control. Through planning, an	
	organization is likely to gain economic condrol, its through	
	planning hat the element of budget arises in affairing	
	a certain goal The organization will be able to control	
	its resources (Economic resources).	
	Facilitate condrol. Planning arcist greatly	
	in the task of control, most management tasks interoct	
	for instance in this planning positiate control as if	
	cets goals and standards to be achieved thus control	
	is easen and factitated.	
	Lastly concentration on objective. Planning	
	is escential as it assists and reminds the organization	
	to socue and beconstant to the objective or goals	
	set by the organization in the first place.	
	t	

Extract 3.1 presents a sample of a response from a script of a candidate who managed to analyse the task performed in staffing as the function of management and explained the importance of planning in management.

On the other hand, most of the candidates who scored from 0.5 to 5.5 skipped part (a) and attempted only part (b) of which they managed to explain at least two correct importance of planning as a function of management out of six which were required like proper use of the available resources, avoiding risks without explanations or with insufficient explanations. Some of the candidates misinterpreted the question in part (a) and they focused their discussion on the functions of management which was contrary to the demands of the question but they scored some marks from part (b) from which they were able to explore some correct points.

Some candidates who scored a 0 mark deviated from the demands of the question while others defined only the key terms from the question like staffing, planning and management. Other candidates in this group explained some functions of management such as organising, staffing, directing and motivation in part (a) and a few candidates explained on the functions of directing as management functions in part (b) which were contrary to the requirement of the question and their responses were: supervising, guiding and issuing orders to the subordinates. Extracts 3.2 and 3.3 are the samples of responses from the candidates who failed to understand part (a) and (b).

Extract 3.2

the gim.	

Extract 3.2 is a sample of an incorrect response from a script of a candidate who misinterpreted the question by writing on the functions of management instead of analysing the task performed in staffing as a function of management.

Extract 3.3

<i>G(b)</i>	Management in organizing, directing, staffing, co-orclinating, controlling	
	and planning of all the activities within an organization. In	
	management planning is one of the function of which is of import-	
	ance. Of which planning involves vetting of plane, objectives, achie-	
	vement or goal v of an organiantian. It of important because:	
	firstly, planning is of importances wince an organization overviews	
	the plans to be implemented	

Extract 3.3 presents a sample of a response from a script of a candidate who attempted only part (b) of the question by highlighting the functions of management as a definition of management instead of explaining the importance of planning in management.

2.2.4 Question 4: The business office

The question had two parts that is part (a) and (b). In part (a), the candidates were required to describe four major types of office staff commonly found in the business organization while in part (b) they were required to explain the five essentials of an efficient office.

This question was attempted by 320 candidates (30.7%) of which 1.2 percent scored from 16 to 18 marks, 10.7 percent scored from 10.5 to 15 marks, 36.2 percent scored from 6 to 10 and 51.3 percent scored from 0 to 5.5. The performance in this question was average.

The candidates who performed well in this question scored from 10.5 to 18 marks. They managed to provide reasonable number of points with correct details to most of the points. In part (a), most of the candidates managed to describe types of office staffs like supervisors, office manager, secretaries and messengers. However, some of them did not mention clerks because they thought that their duties are the same as messengers while they are not. They also managed to explain correctly all essentials of an efficient office organization. Some points like location, layout, furniture, office staff, premises for office and stationary and office equipment were included in their responses. Extract 4.1 shows a sample of a good response.

Extract 4.1

6 a) office stuff are the people who perform
all Cleinical work and other Works in an

Extract 4.1 is a sample of a good response from a candidate who managed to describe some types office staff commonly found in business organizations and explained the essentials of an efficient office organization however some of the points contained partial explanations.

On the other hand, the 41.3 percent of the candidates who did not perform well; that is, who scored from 0.5 to 5.5 marks, explained very few points compared to the required points on each part or they

answered only one part of the question. Some candidates mixed correct and incorrect answers in part (a) such as teachers, supervisors, office managers and doctors. Others explained some essentials of an efficient office organization such as office equipment and furniture in part (b) together with other incorrect points like transport facility and allowances to workers. Extract 4.2 presents a sample of a poor response.

The candidates who scored a 0 mark (10%) failed to understand the question. Some of them wrote some of the activities that are to be performed by some of the office staff like recording of information, receiving of information and proper file keeping. Other candidates in this group explained the different work done by office staffs such as teachers, security guard, accountants and cooks but they failed to group them under specific category. Some of the candidates who misinterpreted the question wrote on the factors which contributed to the achievement of organization goals.

	V	

Extract 4.2 presents a sample of a poor response from a candidate who described the factors which contribute to the achievement of the organization goals instead of describing the essentials of an efficient office of organization.

2.2.5 Question 5: Taxation

The question had two parts (a) and (b). Part (a), the candidates were required to analyse the importance of tax in the economy of the country and in part (b) they were required describe five problems that face tax authority in Tanzania.

The question was attempted by 1,013 candidates (97.2%) of which 28.4 percent scored from 15.5 to 20 marks, 57 percent scored from 10.5 to 15 marks, 13.7 percent scored from 6 to 10 marks and 0.9 percent scored from 3.5 to 5.5 marks. The overall candidates' performance in this question was good. This good performance could be attributed to the fact that the topic from which the question was set is taught in other subjects like Economics hence the candidate might have exhausted a wide coverage of the topic and managed to transfer knowledge from such subjects.

The candidates (85.4%) who scored high marks in this question were able to analyse the importance of tax in the economy of a country and described the problems facing tax authority in Tanzania. Many of these candidates managed to provide relatively correct answers in part (a) such as a source of government revenue, it discourages consumption of dangerous goods, reduces income inequalities, maintain economic stability and being a source of investible capital. Furthermore, in part (b), a few candidates managed to provide correct answer by providing all required points with detailed explanations but most of them described at least three problems out of the required five which include corruption among the tax officials, illiteracy of the taxpayer, inadequate record keeping together with tax evasion and avoidance. The other correct points which were not described by some of the candidates include lack of patriotism, low tax base, inaccessibility and reluctant of the people in paying tax. Extract 5.1 presents a sample of a good response.

Extract 5.1

	Ct 5.1	
<u>5(a)</u>	Tax is the compasory payment	
	made by individual and the tirm to the	
	government in order to increase revenue of the	
	government. There are three System of taxation	
	which are Progressive, regressive, propotion tax	
	System. the importance of tax in the country	
	are explained as follow:	
	Reduce income inequalities. Tax	
	reduce the income inequality between poor	
	people and rich people in the country. By using	
	Progressive taxations System and Surtax	
	(tax payed by rich people) help to reduce income	
	inequality between poor people and rich -	
	people in the country.	
	Increase government revenue.	
	Tax increase the rovenue to the government.	
	Which help the apvernment to meet its	
	public expenditure like Construction of road health	
	care building ect which will stimulate the	
	growth of economic of a country.	
	Control inflation Convernment	
	use the taxation system to control inflation	
	in the country. In the time of inflation	
	the government reduce indirect tax in to decrease	
	the price of the product and Increase direct tax	
	in order to reduce purchasing power of people	
	which help to control inflation.	
	Control importation of harful product.	
	By using tax like import tarrif, and guotas	
	the government control the importation	
	of harmful product in the country which will	
	affect the citizen when they enter in the country.	

-		
5(0)		
	Government use the tax to correct the difficity	
	in the balance of payment. Tax is used to	
	discourage importation of gods and services	
	due to that it correct difficit balance of	
	payment in the country.	
	Those are the importance of tax	
	in the economy of a country. Tax is very helpful	
	in controling some economic problems so the	
	the government must provide education -	
	inorder for people to pay tax willingly	
	and to decrease tax evasion and avoidance.

500	i sal al line the annual of
30	imposing and calculating the amount of
	tax to be paid by certain person
	in the country.
	Tax avoidance and evasion. In
	lanzania there is high rate of tax awidance
	and tax evasion in the country which
	make Tanzania revenue authority to
	Collect small amount of money compared to
	its plan.
	Ignorance of people. In Tanzania
	many people are ignorant about the important
	of tax in the economy so they fill unhappy
	when they charged tax due to that
	the provide wrong information inorder to
	escape tax.
	Corruption. This is another
	problem face the tanzania revenue authority.
	This occurred when the workers (officials) of
	tanzania revenue took money collected as
	tax from firm and individual for their
	personal use.
	Those are some of the problem
	face the Tanzania revenue authority (TRA)
	in the country if those problem solved
	the (TRA) Tanzonia revenue authority will
	work at a goods condition and the government.
	will get high revenue from tax.

Extract 5.1 shows a sample of a good response of a candidate who managed to analyse the importance of taxation to the economy of the country and the problems facing tax authority in Tanzania.

Despite the good performance in this question, there were a few candidates (0.9%) who scored from 3 to 5.5 marks. These candidates provided a few number of points to each part of the question compared to the required number of points. Some candidates managed to mention some correct points on the importance of taxation to the economy but failed to provide correct descriptions. For example, tax avoidance and evasion was described as the government failure to collect tax. The other correct point

mentioned by the majority of the candidates was corruption but some of them provided incorrect explanations such as *the corruption is made between the tax collectors and TRA managers*. Moreover, some candidates provided some irrelevant points like lack machine of policy, lack of employment, non-economic to tax payer, poor employees the country become bankrupt and poor country security of which were found in part (b). A few candidates misunderstood the question in part (b) because their responses focused on the disadvantages of taxation to tax payers which were contrary to the question.

2.2.6 Question 6: Contract of Sales

The question had two parts, (a) and (b). In part (a), the candidates were required to explain five rights of unpaid seller of goods under contract of sale whereas in part (b) they were required to explain briefly the term 'contract of sale' and outline four rules for transfer of title under sales of goods Act.

The question was attempted by 922 candidates (88.5%) of which 3.3 percent scored from 16 to 19.5 marks, 21.7 percent scored 10.5 to 15 marks, 49.2 percent scored from 6 to 10 marks and 25.8 percent scored from 0 to 5.5 marks. These data indicated that overall performance in this question was good.

The majority of the candidates (25%) who scored high marks managed to explain the rights of unpaid seller of goods under contract of sale correctly such as right of stoppage of goods in transit, right to resale the goods, the right to repossess, right to sue for the damage, right to sue for interest and right to sue for price in part (a). Although not all of them managed to explain all rights, the majority explained at least four points and above. Likewise they demonstrated their ability by explaining the rules for transfer of tittle under sales of goods Act in part (b) for example if goods are sent on approval or return basis, in case of contract of specific goods which are not on deliverable and in case of specific goods ready for delivery. The variation of their marks determined by the number of correct points and the ability a candidate in explaining the points.

The candidate with average performance managed to explain at least three correct points in part (a) like the right to repossess the goods, right to resale the item repossessed, the right against the goods and the right to sue in case of any damage. They also managed to score full marks from the meaning of the term contract of sale but very few were able to outline at least one of the rules required in part (b). Most of these candidates answered only part (a) and avoided part (b). This showed that they had insufficient knowledge on contract of sales. Extract 6.1 presents a sample of a good response from a script of a candidate who managed to answer part (a) of the question correctly.

Extract 6.1

Go Five pighti is unpaid seller	
Unpaid Seller is seller whose buyer	
refuse to make payment for the	
for the goods on the agreed price	
Camabina have Februe: by mouse noume	
Sometime buyer repuse to make payme	
nt to the sales under different arounds	
ance. The following are the right of	
the seller for unpaid you'ds by a	
buyer	
The right to itspage goods in transit	
the relier has anight to stop goods in brandt	
If the buyer has marry Ropuse to make-	
Prayment for the goods that give the right	
for seller to hum gods in warehouse	
The right resule for the goods	
that is the seller has right to sell goods	
banother person, whom anyer has regent	
to make payment for the price agreed	
In goods.	
The right to sue for price, That	
15 the Seller has a right to the huyer	
for price of goods which may can refuse	
be pary for it	
The right to rue for demage. In	
in banist, the seller has right to sue	
In brance the seller has right to rue	
him undermand for the goods destroyed to	
Compeniated!	
that it the seller has a right losue the	
buyer for interest on price for the goods	
when the teller may are any cost to	
prepare grade for doliver to the buyer	
Apart from the right of unpaid sells	
also there is right of feller when the sollo	
Feature the buyer to deriver the grounds from	
When it regreed to pay for price	

Extract 6.1 shows a sample of a good response from a script of a candidate who managed to explain the right of unpaid seller under the contract of sale.

Most of the candidates who scored low marks (0.5 to 5.5) could define the term contract of sale, and pointed out and explain some rights of unpaid seller of goods under the contract of sale and some of their responses were the right to repossess and the right to resell the goods. Other candidates provided partial definition of the term and mentioned some right without explanations.

The candidates who scored a 0 mark provided incorrect answers due to inadequate knowledge or misconception of the question. This is justified by their responses where some of them explained the ways of terminating contract especially discharge by agreement, by performance and by frustrating in part (a). They thought that whenever the buyer failed to pay for the goods the seller might discharge the contract of sales which is applicable to other contract other than a contract of sale. Others wrote on informal agreement used by the sellers in collecting their debts from buyers who failed to pay their debts on time such as setting specific time, signing the agreement and paying the debts by instalments. Moreover, in part (b), they pointed out the rule regarding delivery of goods such as place of delivery, time of delivery, and expenses of delivery which were contrary to the question while others outlined the essential characteristics of a contract of sale of goods instead of the rules for transfer of title under sales of goods Act. Extract 6.2 is a sample of a response from a script of a candidate with a poor response.

Extract 6.2

661 ANGHIER.	
Contract of sales is the agreement between	-
The buyer and selet to buying goods	<u> </u>
for a specific penod of hime	
To explain five rights of unpaid seller of	
goods under Contract of sales are as	
follow!	
Make a specific of time The seller are	
make specifice time which agree if can make	
the centraet of sale,	<u> </u>
To transfer goods: The seller are make	
The goods transfer to place they are needed	
for emtract y tale are macle.	<u> </u>
Price of goods. The seller are aight	
to melle the price of the commodity which	4
as are sold to the buyer. Amount paid. The seller are aght	
Amount parel. The seller are again	
he amount will pay the buyer after buying goods are received from the amount will agree by the buyer to pay.	
duying golds are received from the	<u> </u>
To sign the freates: The seller are	-
night to the buyer to righ the contract	
which are agree for a specific period of	
prie her name of buyer and seller mus	
be uniter.	
From the above information this	
is hoe highest of unpaid seller of goods	,
is those nights of unpaid seller of goods under centrall of sales	

	ANISHER
	Contract of sale is the agreement betw-
	een the buyer and setter when bigging and seling goods and services, example Suma
	and seling goods and services, example Suma
	are contract of Sale by Ali Moreler to
	buying and seling yords and senices. To outline forer rules for transfer of
	To outline forer rules for transfer of
	title under the sales of goods Act know
	are as follow:
	Transfer goods: When have of Contract
	of sale if transer givel from Wher to
	buy up to the place of store the good
	Subject matter of Centract (goods): This is contract of sale if must be buying and soling good if there are no goods
	is contract of sale is must be earling
	and soling good if there are no goods
	The contract do not applied. Price! If the contract of Sale it
	must a price of commodity Which
	buying or selving from the feler if
	There are but price the goods whiley
_	are not beling.
	Specific period: The goods which are
-	sold must agree the penod which pay
	the buse for senied which are agreed
	From the above supermation flis is
	The four nels which used to marger
	of the title under the sale of yords seg

Extract 6.2 presents a sample of a poor response from a candidate who focused on the essentials characteristics of a contract of sales of goods in part (a) and some of the rules regarding delivery of goods in part (b).

2.2.7 Question 7: Marketing.

The question had two parts, (a) and part (b). In part (a) candidates were required to examine five methods involved in carrying out market research and in part (b) were required to state five factors which affect successfulness of market research in developing counties.

The question was attempted by 220 candidates (22.7%) of which 77.3 percent scored from 0 to 5.5 marks, 20.9 percent scored from 6 to 10, 1.8 percent scored from 10.5 to 12 marks which was the highest score in this question. The statistical data show that the performance in this question was poor.

The candidates who scored from 0.5 to 5.5 marks were able to examine at least one method used to carry out market research like questionnaires or interview. Furthermore, they mentioned few points on the factor for unsuccessfulness of market research to undeveloped countries such as language barrier, lack of insufficient fund and poor transport facilities. Some of them mixed correct with incorrect answers, especially in part (a).

The candidates with a 0 mark provided incorrect responses because knowledge the subject poor on matter tested and misinterpretation of the question. In part (a), the majority of the candidates focused on the steps involved in carrying out market research instead of methods used in carrying out market research they failed to differentiate steps from methods. In part (b), some candidates explained on the indicators of a successfulness of market research like increase in sales, increase in production and increase in profit. Others mentioned some necessary factors in carrying out market research including sufficient fund, good transport facilities, availability of data, and good communication. Extract 7.1 shows a sample of a poor response from a candidate who misinterpreted the question in part (a).

Extract 7.1

Extract 7.1 is a sample of a poor response from a script of a candidate who explained steps used in carrying out market reseach instead of methods used in carrying out market reseach.

The candidate with average score from 6 to 10 marks managed to explain at least two correct points in part (a) such as questionnaires and consumer survey/interview which were explained by many candidates in this group. They also managed to state at least three correct factors out of five which were required in part (b) even though some points were partially explained.

A few candidates (1.8%) who scored above average marks managed to examine the methods used in carrying out market research and stated some factors that affect the successfulness of market research in developing countries with some examples. Extract 7.1 is a sample of a good response.

Extract 7.1

7	(a) Market research is a process of inve
	Stigating a potential or existing market and
	finding out useful Information that can be
	used in the formulation of bunnariss pouces.
	The following below are methods involve
	d in carrying out market research.
	Observation, is the one of the method
	involved in courying out markert research, This
	method involves in found out what existing
	in the market. For example consumer demand.
	Internal research, this is also another
	method of corrying out research. This involves
	checking the internal records of the business, heray
	se every business leeps records concerning tells and
	transaction taken place, hence
	Pilot Scheme, Also this is another
	method of carrying out market research, this
	involves the taking one product as a sample
	unthin the market and test how it works.
	Consumer's survey, This ois also
	another method of carrying out market
	research, under this method + it involve
	the interview of with the customer. It inv
	olve the process of interviewing the customers.
	interesting interesting
	Questionaires, This is the comme
	n method of Courrying out research, This
	method involve providing of Sample of
	questions to be aswered
	- I would be

1	b) The following below are the Sactory
	which affect successfulness of market resp
	arch in developing countries.
	Language barriers, This is the
	one of the factors which affect
	Success fulness of market research in developing
	Country like formania, under this during the
	time of interviewing consumors it become diffi
	oult to set data from them due to difference
	in language.
	Lack of Insenficient Lund, Also this is
	another factor which affect market research as
	there become shortage of funds to employ esti
	ciency tools that can be used in collecting informa
	tion from various areas.
	Lack of transport facilities, pliso this
	is another factor which affect market rese
	arch, as there become districut to conduct
	market research to an areas where there
	is por transport facilities. Klow they face pour
	lems of lack transport to the indegeneous areas.
	Lack of skilled personnel, Also this
	is another factor which affect market repearch,
	where in market research there become no skilled
	personnel who can conduct market besearch effective
	Lack of clear statistical data, market
	research in a developing ountry like tanzania
	is faced with the problem of lack of Clear statistical
	data. This happen when the number of people interniew
	ed 15 wrong because not the whole population mil
	be in ferniowed.

Extract 7.1 shows a sample of response from a script of a candidate who managed to examine the method of carrying market research and state some correct factors affecting successful marketing research in developing countries.

2.2.8 Question 8: Import and Export Trade.

The question had two parts, (a) and (b). In part (a), the candidates were required to analyse five functions of chamber of commerce and in part (b), they were required to identify three intermediaries used in import and two used in export trade.

The question was attempted by 295 candidates (80.1%) of which 34.1.percent scored from 10 to 16.5 marks out of 20 marks, 46 percent scored from 6 to 10 and 19.9 percent scored from 0 to 5.5. The statistical data indicates that the candidates' performance in this question was good.

The candidates who scored from 10.5 to 16.5 managed to explain some functions of the chamber of commerce as well as identifying the intermediaries used in import and exports. Their explanations in part (a) showed that they had sufficient knowledge because they were able analyse functions of chamber of commerce like to educate the members on better means of production, ensure harmony and better understanding between the members, act as a spokesman of business community and collects transmits information. also managed to identify either They intermediaries used in import or export. Their performances vary according number of points analysed and the ability of a candidate to defend the points in a correct perspective. Extracts 8.1 and 8.2 are samples of good responses.

Extract.8.1

	are paid commercian for their service						
	The first commence to love at the						

Extract 8.2 shows a sample of a good response from a candidate who managed to identify intermediaries used in import and export trade.

On the other hand, there were some candidates whose performance was average and their scores ranging from 6 to 10 marks. They understood the question but they showed some weaknesses on their explanations on some of the functions of the chamber of commerce. Furthermore most of them managed to identify at least three intermediaries used whether in import or export. Some of them answered correctly in part (a) than in part (b) and the vice versa.

However, the candidates with low marks had their scores ranging from 0.5 to 5.5 because they had little knowledge on the subject matter which had evidenced by their explanations. Some of them mixed correct with incorrect points, especially on import and export intermediaries while others managed to analyse only some functions of chamber of commerce with inadequate explanations and did not score any marks from other part of the question.

Some candidates who scored a 0 mark provided incorrect responses because they failed to understand the requirement of the question and lacked knowledge on chamber of commerce and international intermediaries. One of them explained on the functions of the national bank of commerce while other candidate wrote the functions of marketing board like creating market for agricultural products and providing loan to its members. Two of these candidates explained the functions of wholesalers instead of the chamber of commerce and pointed out some traders involved in home trade and foreign trade. Extract 8.3 presents a sample of a poor response.

Extract 8.3

<u> </u>	
86) Trade implies keying and velling of goods either within the	
country or outside the boundary of export trade, import touch . There	
Veveral intermediances on these forms of trade, by utarking with	
the intermediaries of import trade are as follows,	
Petonier, this is an agent in the import trade of whom he	
buyly goods on relatively large quantities and well them on a	
reasonable price to the final consumer at small quantities.	
Wholesaler, this is an eigent in the import trade of whom	
by buy is an bulk to the wholevaller and vell them on large quant-	
ities to the retailer.	
Many acturing agent, this also may be one of the intermedi-	
aries of import trade where he distributes goods from the	
manufacture directly to the wholesaler or directly to the pinal	
Consumer	
Alvo below follows the intermediaries of export trade	
and are as follows,	
Exporter (exports); this is an intermediary who vells goods	
to other country or abread.	
Importer; this is an intermediary who buys goods	
within the country of who che are brought into the country.	
within the country of the constant into the country	
8@ Chamber of Conmerce is a non-organisation deals with	
Communical activities of people connected with commerce, Endustry,	
and trade. The chamber of commerce does many functions and	
the selow follows the tew;	
To ensure goods are produced and brought into the market;	
1 TO CHOICE your way produced and approprie the made,	

Extract 8.3 shows a poor response from a candidate who pointed out a function of a producer to consumers in part (a) and wrote on different traders in part (b).

3.0 PERFORMANCE OF CANDIDATES IN DIFFERENT TOPICS

The topic analyses shows that the performance of the candidates in Commerce subject, in the ACSEE in 2015 was good since the candidates had good performance in 14 topics out of 17 topics examined in paper 1 and 2. The good performance of the candidates topic-wise was as follow: The Scope of Commerce 99.8 percent, Taxation 99.1 percent, Production 98.8 percent, Business Units 95.2 percent, Transport and Communication 95 percent, Wholesale Trade

94.70 percent, Foreign Trade 92.5 percent, Insurance 88.8 percent, Banking 87.9 percent, Import and Export 80.1 percent, Organization and Management of Business 79.9 percent and Contract of Sales 74.2 percent. The candidates had average performance in the top of The Business Office by 48.7 and weak performance in the topics of Warehousing and Marketing by 26.55 percent and 22.7 percent respectively.

Moreover, the comparison of candidates' performance in 2015 and 2014 revealed that, in 2014 the performance in the topic of Advertising was average while in 2015 the performance in this topic was good. The good performance in this topic could be attributed to the candidates' ability to identify the task of the question and sufficient knowledge on the topic. Moreover, in 2014 the performance in the topic of Marketing was good but in 2015 the performance of the same topic was weak. The reason for weak performance might have been caused by the candidates' failure to identify the task of the question, insufficient knowledge and skills together with misinterpretation of the questions. The attached Appendix shows a summary of the candidates' performance in each topic, where green colour indicates topics with good performance, yellow colour topics with average performance and red colour topics with weak performance

4.0 CONCLUSION AND RECOMMENDATIONS

4.1 CONCLUSION

Generally the performance of candidates in 152 Commerce, in the ACSEE in 2015 was good compared to 2014. However, the weak performance noted on the topic of Marketing and Warehousing could be attributed to insufficient knowledge on the subject matter tested, poor in mastery of English Language and misinterpretation of the question.

It is expected that the feedback provided in this report will enable teachers, students, parents and other stockholders to take appropriate measures for the better performance of the candidates in future examinations

4.2 **RECOMMENDATIONS**

In order to improve the performance of prospective candidates, the following are recommended:

- (a) Candidates should carefully read the examination questions in order to identify the requirements of the questions.
- (b) Candidates should be guided on how to identify the task in various questions and also how to respond on such tasks.
- (c) Students should be encouraged to read textbooks and search internet materials so as to broaden their understandings on the subject.
- (d) Teachers should ensure complete and thorough coverage of the topics which are stipulated in Commerce syllabus. This will enable the candidates to acquire the required knowledge and skill in every topic.
- (e) Teachers should administer regular exercises, tests and examination so as to encourage students to work hard.
