FOREWORD

The National Examinations Council of Tanzania is pleased to issue the Accountancy Examiners' Report on the Candidates` Items Response Analysis in Advanced Certificates of Secondary Education Examinations (ACSEE) 2016. The report provides feedback to students, teachers, parents, policy makers and the public in general on the performance of the candidates.

The Advanced Certificates of Secondary Education Examinations marks the end of two years of Advanced Secondary Education. It is a summative evaluation which among other things shows the effectiveness of the education system in general and the education delivery system in particular. Essentially, the candidates' responses to the examination questions is a strong indicator of what the education system was able or unable to offer to the students in their two years of Advanced Secondary Education.

The analysis presented in this report intends to contribute towards understanding of some of the reasons behind the performance of candidates. The report highlights some of the factors that made candidates to score high marks in the questions. Such factors include; ability of the candidates to adhere to the demands of the question, identify the task of the questions, express themselves in English Language, acquisition of knowledge of the concepts related to the subject. Few candidates who scored low marks in the examinations failed to adhere to the demand of the question and identify the task of the questions. They also showed inability of expressing themselves in English Language and lack of knowledge of the concepts related to the subject. The feedback provided will enable the educational administrators, school managers, teachers and students to identify proper measures to be taken in order to improve candidates' performance in future examinations administered by the Council.

The National Examinations Council of Tanzania will highly appreciate comments and suggestions from teachers, students and the public in general that can be used for improving future Examiners' Reports.

Finally, the Council would like to thank all those who participated in the preparation of this report.

Dr. Charles E. Msonde
EXECUTIVE SECRETARY

1.0 **INTRODUCTION**

This report analyses the performance of the candidates in Accountancy for the Advanced Certificate of Secondary Education Examinations (ACSEE) in 2016 The Accountancy examination adhered to the 2009 syllabus and was set according to the 2011 Examination Format.

The examination comprised of two papers, 153/1 Accountancy 1 and 153/2 Accountancy 2. Both papers consisted of seven (7) questions which were divided into two sections namely A and B. Candidates were required to answer any five (5) questions in each paper, three questions from section A and two questions from section B. Each question carried 20 marks.

A total of 1,429 candidates sat for Accountancy examination. The results show that 92.91 percent passed the examination with the following grades: grade A 1.82 percent, grade B 8.68 percent, grade C 22.25 percent, grade D 32.26 percent, grade E 22.53 percent and grade S 5.04 percent. The general performance of candidates in Advanced Certificate of Secondary Education Examinations (ACSEE) May, 2016 in Accountancy paper was good.

The Accountancy examination results for three consecutive years show that, in the year 2015 results were good compared to those of year 2014, In the year 2016, the results have decreased by 6.9 compared to the year 2015. See the table below:

Sn.	Year	Number of the Candidates sat for Exams.	Passed	Percentage	Failed	Percentage
1	2014	825	819	99.27	6	0.73
2	2015	1,042	1,040	99.81	2	0.I9
3	2016	1,429	1,323	92.91	10 1	7.09

The analysis of individual questions is presented in the next sections. The presentations examine the requirements of each question and the way the candidates answered them. This analysis shows both strengths and weaknesses of candidates in answering questions. Selected extracts of candidates' responses are included to enable stakeholders experience the reality of candidates' responses to the questions. The extracts are based on scripts of candidates who were able to satisfy the requirements of the questions and those who were not able. It is expected that, such detailed analysis will enable the stakeholders to take appropriate measures in improving the teaching and learning of Accountancy.

2.0 ANALYSIS OF PERFORMANCE OF CANDIDATES IN EACH QUESTION

153/1 Accountacy I

2.1.1 Question 1: Explaining why the following Parties need Accounting Information.

This question consisted of five (5) items drawn from the Nature and Context of Accounting (Users of Accounting Information) of the syllabus. The candidates were required to give explanations as to why Management, Business owners, Creditors, Employees, and Financial Institutions need accounting information. The question intended to measure the candidates' comprehension ability and knowledge on various concepts of accounting and the application of such knowledge in their daily life.

The question was attempted by 62.8 percent of all candidates. The performance in this question was average, as 52.4 percent scored 0 to 6.5 marks, 38.6 percent scored 7 to 11.5 marks and only 9 percent scored from 12 to 20 out of the 20 allotted marks. Figure 1 is a summary of the distribution of the candidates` scores.

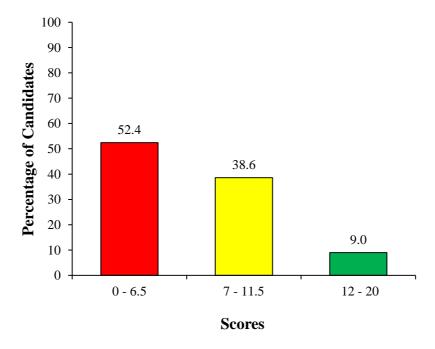

Figure 1 Candidates Performance in Question 1

Some of the candidates who performed well managed to provide explanations on why each of the given parties needed the accounting information. They explained that, Management is interested in the information relating to business like setting up targets for future periods.

Business owners need accounting information relating to amounts of earnings, expenses and profit or loss sustained in business. Creditors need accounting information to know the financial stability of the entity and the ability of the firm or enterprises to settle its obligations. Employees are interested in the performance of the business since their bread and butter depend upon the earnings of the business and assurance of their employment. Financial institutions need accounting information to help them to assess the profitability and financial soundness of the business so as to determine its ability to meet maturing obligations like payment of interest on loans, principal amount and making decisions whether or not to extend credit to the business. Moreover, they provided some examples to support their explanations. A sample of such responses is shown in extract 1.1

Extract.1.1

1.	a) Management.						
	- The programment rough amount on intermention on						
	as to know the progress of the business and identify						
	in what position their business is in so that an imm-						
	ediate aution may be taken into consideration if at all						
	as to know the progress of the business and identify in what position their business is in so that an immediate aution may be taken into consideration if at all the business is not performing efficiently as it should.						
	Also management requires accounting informantion so as to know how the dividends will be divided among the						
	know how the dividends will be divided among the						
	Shareholders .						
	b) Burners owners.						
	>These are stransholders and capital contributors or sometimes promoters of the Javiness who require accounting informan-						
	promoters of the business who require accounting informan-						
	tion so as to to know the tinancial position of the firm and to determine whether they will be entitled to						
	and to determine whether they will be entitled to						
	a profit or loss during a particular financial period.						
	c) Creditors						
-	=> These are people who lend I money to the company or						
	the time. Such creditors require accounting information so as to know whether the time is in a partition to pay						
	the amounts owed to them or indue of poor performance						
	shown through the statements the creditors would tend to						
	shown injudy the statements the deadless according to the same forms of the same for						
	claim for their proceed; before a company is liquidated or wound up.						
	IN wanta ap						

	+
1.	d) Employees.
	=> They are the oner who are engaged in a company or firm
	to work as certain professionals specializing in particular
****	fields of expertise in the company. Employees require account
	ting informantion so as to they could use them as a basis
	tor claiming more usages when the protite of the company
	tent to increase and as shown in the statements.
	e) Financial institutions
	=> Such truttlutions may be inneed of accounting information
	so as to facilitate various payments such as standing orders,
	insurance premiums and also they may use accounting
	offset the differences prevailing between the firm's books
	information to prepare bank reconciliation statements to offset the differences prevailing between the firm's books and the bank.

Extract 1.1 shows sample of a candidate's correct response to the question. This candidate provided clear explanations on the need for accounting information to various users.

Some of the candidates who had average performance in this question explained the need for accounting information to some of the mentioned users, while others failed to provide clear explanations why the other users need the accounting information. This was attributed by the fact that some of them had poor knowledge of the accounting concepts while others failed to express themselves well in English Language.

On the other hand some of the candidates, who performed poorly in this question, misunderstood the question and explained the mentioned users of accounting information instead of explaining why those users need accounting information. Others had inadequate knowledge about users of accounting information. This made them to provide unrelated responses with few sentences which were characterized by a lot of grammatical errors. A sample of such responses is shown in extract .1.2

Extract.1.2

SECTION-A
11(a) Managenerot is the process of
organizing in order to take certain
activiles. Example in school there
are management
(b) Business owner & the group of
beeple whose own business in acta
trganization,
(c) Ereditors is the pegroup of persons
to whom owe money to some one.

15	a Employees are the people whose
14	employed in office or other place trampo
	Teachers in 8 Chool, managers in bank and
	80 Forth,
	(e) Financial institution is the organiz
	ation which deal with money trans-
	Ger, deposite and other neans-Examples
	Bank, howand and other institution,

Extract.1.2 shows a sample of incorrect responses extracted from a candidates script .The candidate provided definitions of the users of accounting information instead of giving description on why they need accounting information.

2.1.2 Question 2:Entering Transactions in Cash Book and Posting Transactions Directly into Sales Ledger and Purchases Ledger

The question required the candidates to prepare (a) Three Column Cash Book (b) Sales Ledger, and (c) Purchases Ledger. Candidates who attempted the question were 56.8 percent of all the candidates. The performance in this question was average as 48.9 percent scored from 0 to 6.5 marks, 31.8 percent scored from 7 to 11.5 marks and 19.3 percent scored from 12 to 20 marks. Figure 2 is a summary of the distribution of candidates` scores.

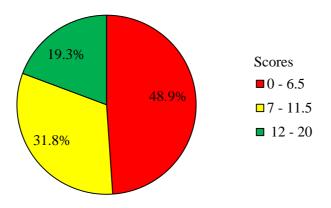

Figure 2 Candidates Performance in Question 2

The candidates who performed well in this question opened the three column cash book indicating the columns for Cash Account, Bank Account and Discounts and they were able to enter the relevant transactions into their respective columns correctly. They also showed the Sales Ledger, opened the relevant accounts and posted all the entries in the required accounts correctly. Moreover, they were able to show the Purchases Ledger, open the relevant accounts and post the entries correctly as shown in the extract 2.1.

Extract .2.1 shows a sample of the candidates' correct responses to the question. The candidate was able to prepare the Three Column Cash Book, Sales Ledger and Purchases Ledgers correctly.

However, it was observed that, the candidates who performed moderately were able to show the Three Column Cash Book, Sales Ledger and the Purchases Ledger, but some of them were unable to open the relevant accounts in the ledgers while some of them failed to post the entries correctly in the respective accounts. On the other hand, candidates who performed poorly did not understand the requirements of the question and failed to show the Three Column Cash Book and posted irrelevant entries to the Sales Ledger and Purchases Ledger accounts. Moreover, they failed to adhere to the principle of double entry system on how to post the transactions to the appropriate side of the accounts and to balance the accounts in the ledgers. Extract 2.2 shows the sample of incorrect responses.

Extract 2.2 shows one of the incorrect response from a candidate who failed to prepare the Three Column Cash Book, Sales and Purchases Ledger Accounts. The candidate prepared a Cash Book without columns and opened the Sales and Purchases Ledger Accounts instead of opening the relevant accounts in the ledgers.

2.1.3 Question 3: Preparation of Bad Debts, Bad Debts Recovered, Allowance for doubtful debts, Water Bills, Salaries, Commission Receivable Accounts and Income Statement.

The question had two parts (a) and (b). In part (a) candidates were required to prepare, Bad Debts Account, Bad Debts Recovered Account, and allowance for Doubtful Debts Accounts. In part (b) the candidates were required to prepare Water bill, salaries, and commission receivable accounts and income statement.

The question was attempted by 91.1 percent of all candidates. The performance of the candidates in this question is generally good, as only 9.9 percent scored 0 to 6.5 marks, 18.1 percent scored 7 to 11.5 marks and 72. percent scored 12 to 20 marks. Figure 3 is a summary of the distribution of candidates` scores.

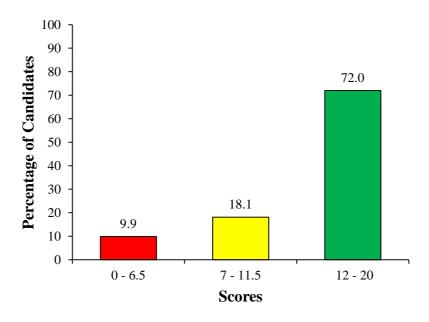

Figure 3 Candidates performance in question 3

The candidates who performed well in this question were able to open the Bad Debts, Bad Debts Recovered and Allowance for Doubtful Debts Accounts as required in part (a) of the question and were able to record the transactions in these accounts correctly. They were also able to make correct computations and balance the accounts properly. In part (b) of the question, the candidates opened the relevant accounts and record the transactions, make correct computations, balance the accounts and

prepare the Income Statement accurately. A sample of correct responses is illustrated in the extract.3.1.

Extract .3.1 shows one of the correct responses from a candidate who managed to prepare the Bad Debts, Bad Debts Recovered, Allowance for Doubtful Debts, water bills, salaries, Commission Receivable Accounts, and the Income Statement correctly.

The candidates who had average performance in this question were able to open the Bad Debts Account, Bad Debts Recovered Account, and Allowance for Doubtful Debts Account, but were unable to post the entries properly. In part (b) candidates managed to open the required accounts and prepare the Income statement accurately.

On the other hand, some candidates who performed poorly, failed to identify the required accounts while others were unable to make correct entries in the accounts.

Furthermore others had poor knowledge in preparing the Income Statement as per requirements of the International Accounting Standard one (IAS1) which requires the Income Statements to be presented in vertical format. Extract 2.3.2 shows a sample of incorrect responses.

2.1.4 Question 4: Preparation of Investment Account valuing closing stock by using LIFO Method.

The question required the candidates to prepare Investment Account Valuing Closing Stock by using LIFO Method.

The question was attempted by 84 percent of all candidates. The performance of the candidates in this question was good as: 21.1 percent scored 0 to 6.5 marks, 33.5 percent scored 7 to 11.5 marks and 45.4 percent scored 12to 20 marks. Figure 4 is a summary of the distribution of candidates` scores

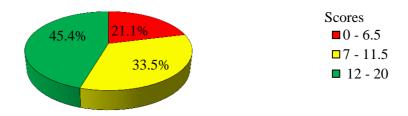

Figure 4 Candidates performance in question 4

The candidates who performed well managed to prepare the investment account by showing clearly the columns for recording the nominal, income and cost value of the investment. They also managed to compute the cum-div purchase price, exdiv purchase price, cum-div sales, ex-div sales dividend income and the value of closing stock by using LIFO method accurately. One of such responses is shown in extract 4.1.

Extract 4.1 shows one of the correct responses from a candidate who had adequate knowledge on Investment Account and valuing of closing stock by using LIFO method.

On the other hand, the candidates who performed moderately managed to open Investment Account but they failed to make proper posting entries, and were not able to use the LIFO method in the computation of closing stock.

The candidates who performed poorly in this question lacked the practical knowledge on how to apply accounting principles on posting entries and making adjustments as well as application of LIFO method of valuing closing stock. An example of such incorrect responses is shown in the extract 4.2.

Extract.4.2 shows response of a candidate who failed to open the Investment Account and valuing closing stock by using LIFO method. The candidate prepared a table of irrelevant items instead of presenting Investment Account.

2.1.5 Question 5: Preparation of Journal Entries to Correct Errors, Statement of Corrected Net Profit and Branch Accounts

This question had two parts (a) and (b). In part (a), the candidates were required to show the Journal Entries to Correct the accounting errors and prepare a Statement of Corrected Net Profit while in part (b) the candidates were required to prepare Branch Stock Account, Goods sent to Branch Account, and Branch Stock Adjustment Account.

The question was attempted by 81 percent of all the candidates. The performance in this question was generally good as only 8.2 percent scored 0 to 6.5 marks, 36.2 percent scored 7 to 11.5 marks and 55.6 percent scored 12 to 19 marks. Figure 5 is a summary of the distribution of candidates` scores

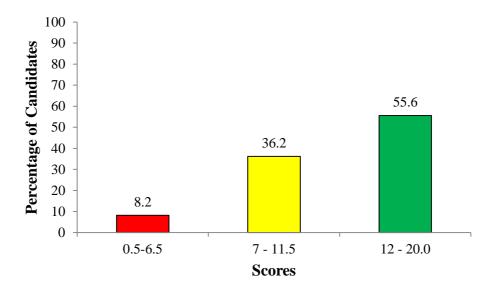

Figure 5 Candidates performance in question 5

The candidates who performed well in part (a) were able to exhaust knowledge on making entries in the journal and prepared well statement of corrected net profit. Moreover the candidates managed to prepare Branch Stock Account, goods sent to Branch Account as demanded in the question. A sample of such responses is shown in extract .5.1.

Extract.5.2 shows response from a candidate who failed to show the Journal Entries to Correct the Errors, prepare a Statement of Corrected Net Profit and Branch Accounts. The candidate entered wrong figures in the Branch Stock and Branch Stock Adjustment Accounts and some of the entries on the wrong side of the accounts.

2.1.6 Question 6: Preparation of Income Statement and Statement of Financial Position

The candidates were required to prepare the Income Statement and Statement of Financial Position.

The question was attempted by 48.4 percent of all candidates, out of which 10.6 percent scored 0 to 6.5 marks, 37.7 percent scored 7 to 11.5 marks and 51.7 percent scored 12 to 17.5 marks. The performance of the candidates in this question was generally good. Figure 6 is a summary of the distribution of candidates` scores

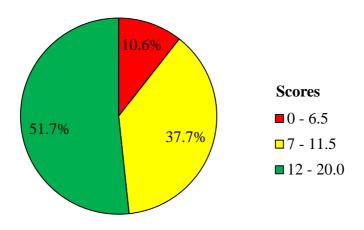

Figure 6 Candidates performance in question 6

The candidates who performed well in this question were able to identify accounting data provided in the question and present them in the Income Statement. Moreover, they managed to classify the components of income and expenses properly. They also managed to present the Statement of Financial Position accurately as shown in extract.6.1

Extract.6.2 shows a sample of incorrect responses to the question. The candidate failed to present the Income Statement in the format requested by International Accounting Standard 1 (IAS1) some of the figures are also incorrect.

2.1.7 Question 7: Preparation of Asset, Provision for depreciation, Statement of Financial Position and calculation of Accounting Ratios

The question comprised of part (a) and (b). In part (a), the candidates were required to prepare Asset, Provision for depreciation accounts and Statement of Financial Position while in part (b), candidates were required to calculate the following accounting ratios; Gross Profit, Net Profit, Expenses as percentage

of sales Gross profit as a percentage of purchases, Stock turnover, Rate of return of net profit on capital employed (use the average of the capital account), current ratio, acid test ratio, debtors sales ratio and creditors purchases ratios.

The question was attempted by 69.1 percent of all candidates. The performance of the candidates in this question was good as only 19.7 percent scored 0 to 6.5 marks, 44.1 percent scored 7 to 11.5 marks while 36.2 percent scored 12 to 20 marks. Figure 7 a summary of the distribution of candidates` scores

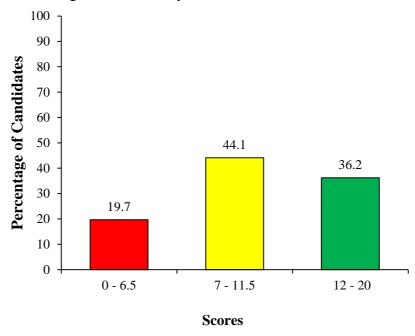

Figure 7 Candidates performance in question 7

The candidates who performed well in this question managed to prepare the Machinery Account, Office Furniture Account, provision for depreciation on machinery account, office furniture account, provision for depreciation machinery, and provision for depreciation on office furniture account and in part (b) the candidates managed to calculate the ratios using the appropriate formulae accurately. Extract.7.1 shows a sample of responses from a candidate who prepared the accounts and calculated the ratios correctly.

Extract.7.1 shows sample of correct responses from a candidate who prepared the accounts and computed the ratios correctly.

The candidates who had average performance in part (a) opened the required accounts but failed to make correct entries in the relevant accounts. In part (b), the candidates managed to identify the relevant formulae and calculated the required accounting ratios while a few of them failed to use the appropriate formulae in their computations.

Those who performed poorly were not able to prepare the required accounts correctly and their computations of the accounting ratios were inaccurate. Extract.7.2 shows a sample of incorrect responses to the question.

Extract.7.2 illustrates sample of incorrect responses from a candidate who entered information related to machinery and office furniture in a combined asset account instead of separate account for each asset.

153/2 Accountancy II

2.2.1 Question 1: Brief Explanations on the Accounting Concepts.

This question consisted of five (5) items drawn from two topics of the syllabus namely Company Accounts and Hire Purchase Accounts. The candidates were required to give brief explanations on the following accounting concepts; General reserve, Hire Purchase Price, Secret Reserve, Reserve Capital and Capital Reserve. The question intended to measure the candidates' comprehension ability and knowledge on the various Accounting concepts and the application of such knowledge in their daily life.

The question was attempted by 60.5 percent of all candidates. The performance of the candidates in this question was generally good as only 24.3 percent scored 0 to 6.5marks, 47.2 percent scored 7 to 11.5 marks and 28.5 percent scored 12 to 19. Figure 1 is a summary of the distribution of the candidates` scores

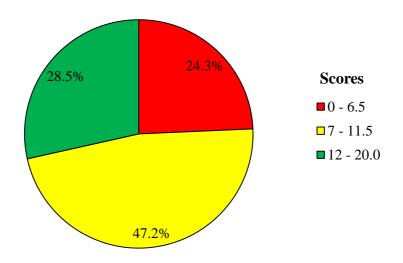

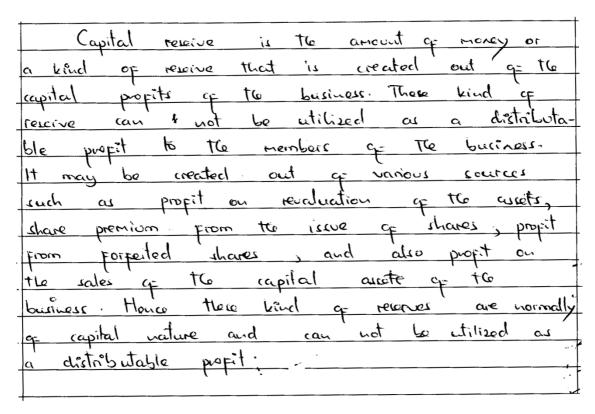

Figure 1 Candidates performance in question 1

The candidates who performed well in this question managed to provide clear explanations of each concept as used in the accounting discipline and tried to show the functions, features and applications of these concepts. Moreover, they provided some examples to support their explanations. A sample of such responses is shown in extract 2.1.

Extract.2.1.

(a) General reserve repers to the amount that
is set aside out of the company's or
Firm's proprit for the purpose of strengthening
The business pinancial position and also to
most any unexpected expenditure that may
most any unexpected expenditure that may
not por a specific purpose but for to
Main aim of meeting any expenditure that
may write at puture dates unknowingly or
unexpected. These reserves are also tormed as
"Free reserver". House in general; the general
receives enables the business to strengthen its
business financial position.
(b) Hire puichase price this is to amount
that is charged on an item That is cold
or bought on hire purchase terms or well systom.
This price includes to portion of costs price of
the item together with the interest charged on
it after a given period of time. This price
also normally is paid an installment terms, that
it may be one your, half yearly or quartely in
a year. Hence hire purchase price can be
obtained by the formulars shown below;
Hime purchase price = Cash price + Interest
OR PINE
Hire purchase price = Down payment + Total installments.
House The hime purchase price is generally
los than the higher Than the each price
- Man 1

(c) Societ receive them are types of receives
that are normally created on secret manner as
are not potrayed in the records of the business.
These receives are normally not shown in the
balance sheet of the business. In this case, it
makes means that the Financial position of
the business is more stronger than what is
shown in the balance sheet at the end of
The accounting period. There reverses can be created
in many ways such as treating the contigent
l'abilities as actual habilities, exessive and
permanent depreciation on the west and also
including the capital expenditures as revenue
expenditures.
1 0 4
(d) Roseive capital is To amount of money
which is set aside in the business to be
used por various purposes. This amount is not
specifically set aside for a specific purpose
but instand is used for any expanditure that may are in To business. This recove
that may arise in To business. This receive
is normally preferred for the capital expendi
tures that may arrise in the business.
The business is lakely to create a reserve
capital in the business out of various sources
such as to propert of the business or
room other sources in order to finance the

Extract .2.1. Presents sample of correct responses from a candidate who managed to provide clear explanations on the accounting concepts.

However, most of the candidates who performed moderately in this question managed to provide clear explanations on some of the concepts but failed to explain clearly other concepts. This was attributed by the fact that some of the candidates lacked sufficient knowledge on concepts and inability to express themselves in English. Candidates who performed poorly lacked knowledge on the concepts and had problems in expressing themselves in English as well as providing irrelevant examples to support their arguments. Extract 1.2. Illustrates a sample of incorrect responses.

Extract .1.2

1.	
(م)	General Reserve
	the refers to one of the type of Pescres
	which are usually abstract by lage from a senstines
	the government. It is common to the whole economy - Example
	The control bank of Tenzenia (Buil has a policy that commercial)
	banks should debress a reserve of 10 bollows to establish
	the francial enstatuion
(b)	Hore purches price
	this refers to the price which the seller and the
	buyer caree on when the buyer has complete possession of the
	good bought. The price that is agreed between them on the
	payment is known as His prochase piece added by interest
	·
(e)	Secret rasere
	These are reserves which a form has an its own
	Just income of emergencies This is usually recommended by
	the from board of direction. Example when a term experse
	dossalves then it has to use an alternative reserve known as
	socret reserve which is vally not used on any case but this is
	·
(d)	Pererre conital
	The refers to the type of reserve which is
	cotion of accital. The firm may wither store some amount
	of money in the capital amounts are reserve in it is needed
	by the two for continuity.
!	
	(e) Capital conserve
	This is a reserve which is stored by the
	From as capital. It is for the purpose of the business
	not to Abetvale or capital thus at just goes to it.

Extract .2.2 shows sample of incorrect responses from a candidate who provided incorrect explanations on the accounting concepts.

2.2.2 Question 2: Preparation of Cases Stock Account at Standard Book Value Cases Suspense Account at Return Price and Cases Income Statement.

The candidates were required to prepare Cases stock account at standard book value, Cases suspense account at return price and Cases income statement.

The question was attempted by 97.5 percent of all candidates out of which only 13 percent scored 0 to 6.5 marks, 40.5 percent scored 7 to 11 5 marks and 46.5 percent scored 12 to 20 marks. The performance in this question was generally good. Figure 2 is a summary of the distribution of the candidates` scores

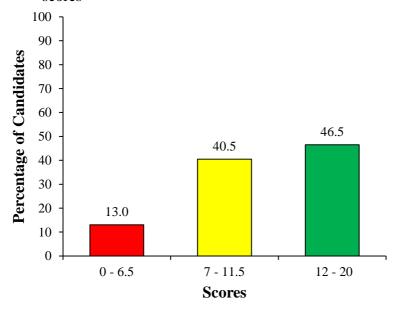

Figure 2 Candidates performance in question 2

Most of the candidates who performed well in this question demonstrated sufficient practical knowledge in preparing the Cases Stock, Cases Suspense Accounts and Cases Income Statement correctly. Moreover, they were able to employ appropriate rates to arrive at the values of the cases in the relevant accounts and proper presentation of the Cases Income Statements. A sample of such responses is shown in extract.2.1

Extract.4.1 shows sample of a correct response from a candidate who passed Journal Entries and prepared the Revaluation Account as well as the Statement of Financial Position correctly.

The candidates who performed moderately in this question prepared the Journal Entries and Revaluation Account but failed to make accounting adjustments on Buildings, Stock and Furniture accounts. They were also unable to prepare the Statement of Financial Position.

On the other hand, the candidates who performed poorly in this question lacked the practical skills and knowledge necessary in the preparation of Journal Entries, Revaluation Account and the Statement of Financial Position. A sample of such responses is shown in Extract.4.2.

Extract.4.2. Shows sample of incorrect responses from a candidate who failed to adhere to the requirements of the question and made incorrect entries in the Journal proper, Revaluation account and the Statement of Financial Position.

2.2.5 Question 5: Preparation of Journal Entries and Statement of Financial Position

The candidates were required to prepare Journal Entries and Statement of Financial Position.

The question was attempted by 8.3 percent of all candidates. The performance of the candidates in this question was weak since 63.9 percent scored 0 to 6.5 marks, 26.9 percent scored 7 to 11.5 marks and 9.2 percent scored 12 to 18 out of 20 allotted marks. Figure 5 is a summary of the distribution of the candidates` scores

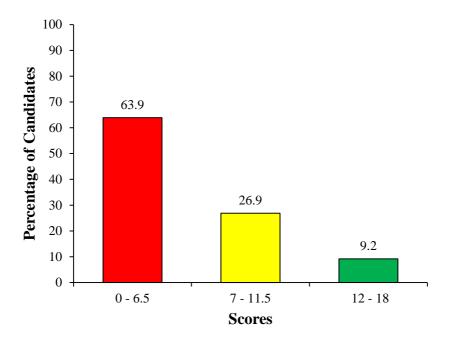

Figure 5 Candidates performance in question 5

Few candidates who performed well in this question were able to adhere to the requirements of the question as they managed to prepare the Journal Entries correctly and the Statement of the Financial Position accurately. The candidates computed the amounts receivable on application, allotment, first and final calls correctly. The amount of Calls in arrears, Calls in advance and share premium correctly. Extract.5.1 shows correct responses to the question.

Extract.5.1 illustrates one of the correct responses extracted from a candidate who managed to prepare Journal Entries and make correct computations of amounts.

The candidates who performed moderately in this question managed to prepare some of the Journal Entries correctly while others failed to adhere to the requirements of the question as they prepared Ledger Accounts instead of Journal Entries. Most of them did not prepare the Statement of Financial Position.

However, majority of the candidates who performed poorly in this question misconceived the question whereby they prepared Ledger Accounts instead of Journal Entries. Some of them lacked the practical knowledge and skills necessary in the preparation of Journal Entries such that after opening the Journal proper they failed

completely to make the entries and none of them prepared the Statement of Financial Position. Moreover, they lacked the ability to compute amounts receivable on application, allotment, calls, share premium, calls in arrears and in advance as well as calculations of the value of forfeited shares. Extract.5.2 shows incorrect response to the question

Extract.5.2 shows a sample of incorrect responses from a candidate who misconceived the question. The candidate prepared Ledger Accounts instead of Journal Entries.

2.2.6 Question 6: Preparation of Journal Entries

The candidates were required to prepare Journal Entries to record the transactions, Irrecoupable Short Workings Written Off and the Closing Entries of the royalties payable account.

The question was attempted by 93.7 percent of all candidates. The candidates' performance in this question is poor as 67.5 percent scored from 0 to 6.5 marks, 14.7 percent scored from 7 to 11.5 marks and 17.8 percent scored from 12 to 20 out of 20 allotted marks Figure 6 is a summary of the distribution of the candidates' scores

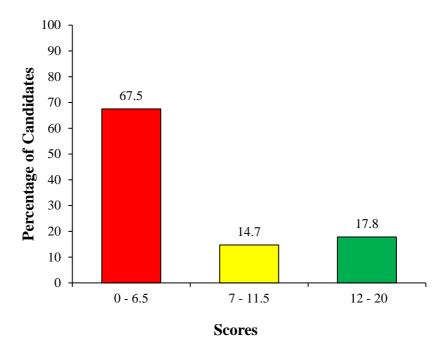

Figure 6 Candidates performance in question 6

The candidates who performed well in this question managed to make correct computations of amounts of the royalties payable, actual royalties, minimum rent and Short Workings Irrecoupable. Moreover, they were able to prepare the required Journal entries correctly. The candidates also successfully showed the Journal entries to Write Off Irrecoupable Short Workings as well as the Closing Entries for royalties payable account. A sample of such responses is shown in extract.6.1.

Extract.6.1 shows sample of a correct response from a candidate who prepared the required Journal Entries, made correct computations of amounts of actual royalties, minimum rent, Short Workings, Irrecoupable, royalties payable and prepared the Journal Entries.

However, some of the candidates who performed moderately in this question managed to calculate the amounts of actual royalties, minimum rent, short workings, irrecoupable short workings and royalties payable but failed to make correct entries in the Journal. Others made incorrect computations of some of the amounts of royalties and some incorrect Journal entries. This was attributed to the fact that the candidates lacked practical knowledge and skills necessary in the computation of royalties amounts and preparation of Journal Entries.

The majority of the candidates who performed poorly in this question misunderstood the task of the question which required them to prepare Journal Entries, instead they prepared Ledger Accounts. Some of the candidates failed to compute the amounts of Actual Royalties, Minimum Rent, Short Workings, Irrecoupable Short Workings and royalties payable. Furthermore, others were unable to make accurate Journal Entries. Extract .6.2 illustrates a sample of an incorrect response.

Extract 6.2 is a sample of response from a candidate who made incorrect computations of amount of Short Workings, incorrect Journal Entries and prepared royalties payable account which is contrary to the requirement of the question

2.2.7 Question 7: Preparation of the Employee's Salary Slips

The candidates were required to prepare the salary slips of the employees

The question was attempted by 96.9 percent of all candidates. The performance of the candidates in this question was generally good as only 3.5 percent scored from 0 to 6.5 marks, 14.8 percent scored from 7 to 11.5 marks while 81.7 percent scored from 12 to 20 out of the 20 allotted marks. Figure 7 is a summary of the distribution of the candidates` scores

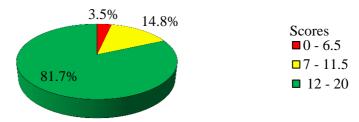

Figure 7 Candidates performance in question 7

The candidates who performed well in this question managed to make accurate computations of amounts of Basic Salaries, Allowances, Gross Salaries,

P.A.Y.E-Tax, Contribution to SACCOS and Health Insurance to NHIF and Net pay to the employees. The candidates also presented the relevant amount for each employee in the respective salary slip in which they were able to show the amounts of Basic salary, Allowances, Gross salary, deductions and finally the Net salary payable to each employee for the month of May 2014. A sample of correct responses is shown in extract .7.1.

Extract.7.1 shows a sample of a correct response from a candidate who calculated the amount of salary for each employee and presented them in the respective salary slip correctly.

The candidates who had average performance in this question were able to make correct calculations of Basic salary and some of the allowances to the employees but failed to compute correctly P.A.Y.E Tax, Gross salary, total deductions and Net salary payable to each employee while others failed to present the data in the proper format of a salary slip. The candidates who performed poorly in this question misconceived the requirement of the question which required them to prepare salary slips of the employee and instead they prepared a payroll. Others failed to make

correct computations of Gross salary, PAYE-tax, total deductions and Net salary while some of them failed to present the data in the employees respective salary slip. Extract 7.2 illustrates a sample of incorrect responses.

Extract.7.2 illustrates some of the incorrect responses extracted from a candidate's script. The candidate failed to compute the correct amount of Gross salary of employees' deductions and Net salary payable to each employee.

3.0 CONCLUSION AND RECOMMENDATION

3.1 **CONCLUSION**

The analysis provided in this report has shown some of the potentials that the candidates had in Accountancy subject. The most notable strengths shown include: the candidates to adhere to the Principle of Double Entry and International Accounting Standards (IAS_S), ability of the candidates to adhere to the requirements of the questions, candidates to express well in English Language, skills in identifying the task of the questions and adequate knowledge of the concepts related to the subject and

practical computational skills in problem solving. The analysis shows that, most of the candidates who performed well in the examination excelled in the topics of *Payroll Accounting, Accounting for Containers, Branch Accounts, Correction of Accounting Errors, Reserves and Provisions and Recognition of Revenue and Expenses.*

Candidates who had average performance in the examination failed to confer to the requirements of the question and could not identify the task of the questions. They were also unable to express well in English Language and had lack of the practical knowledge on the concepts related to the subject. The candidates revealed weaknesses in the topics of *Company Accounts, Accounting for Royalties and The Nature and Context of Accountancy*. The analysis shows that most of the candidates who performed poorly in question six (6) and five (5) of paper two of the examination, failed to adhere to the requirements of the questions and had serious problems in *the* Preparation of Journal *Entries* since both questions required practical skills necessary in making *Journal Entries*. Furthermore it has been observed that the candidates who performed poorly in question one (1) in both papers had problems in expressing themselves in English Language since the questions required them to provide explanations on the Accounting concepts. (See Appendix A)

3.2 RECOMMENDATION

- (a) Teachers should be provided with seminars and workshops to update their teaching and learning process including changes occurring in the International Financial Reporting Standards (IFRS_S) and International Accounting Standards (IAS_S). This will improve candidates' performance in the topic of preparation of financial statements in future examinations.
- (b) Teachers should guide the students to identify specific tasks of the questions and emphasize in details the application of Double Entry Principle when recording transactions. They should also emphasize more on how to prepare Journal Entries for transactions related to the topics of Company Accounts and Accounting for Royalties.
- (c) Students should be encouraged to solve as many questions as possible as this will help them learn different techniques of solving problems and tackling examination questions.
- (d) Students should have enough time to practice using English Language. They should be given a lot of tasks which will help them write, speak, read and listen to various English texts. This will eventually help them to improve the English language skills which were contributing to their poor performance in the questions requiring explanations and descriptions of accounting concepts.
- (e) The candidates should be given more exercises such as weekly or monthly tests apart from the classroom tests, end of term tests and mock examinations. This will encourage them to gain practical skills and knowledge and therefore improve their performance in their future examinations.

Appendix A
Summary of Analysis of Performance of Candidates in Each Question

Sn.	Торіс	Numbe r of Questi ons	Percentage of the Candidates who scored an average of 35% or above	Remarks
1.	Payroll Accounting	1	96.5	Good
2.	Correction of Accounting Errors and Branch Accounts	1	91.8	Good
3.	Reserves and Provisions. And Recognition of Revenue and Expenses	1	90.1	Good
4.	Preparation of Financial statements	1	89.4	Good
5.	Containers Accounts	1	87.0	Good
6.	Partnership Accounts	1	86.20	Good
7.	Depreciation and Disposal of Non –Current Assets and Financial Statements Analysis and Interpretation	1	80.3	Good
8.	Investment Accounts	1	78.5	Good
9.	The Nature and Context of Accounting.	2	49.4	Average
10.	Hire Purchase Accounting.	1	44.0	Average
11.	Company Accounts	2	55.9	Average
12.	Accounting for Royalties	1	32.5	Poor
